

1 MINUTE AGO! James Webb's NEW Discovery Of The Big Bang Changes Everything! (VIDEO 13 min)

Description

You might not be aware of this but there are a lot of facts concerning the Big Bang hypothesis that its proponents don't want you to know. However, the James Webb Space Telescope has given rise to such a possibility. The discovery surprised scientists because it went against what was predicted by our accepted theory of the universe's evolution. Big Bang Theory supporters want you to think that their idea is factual and unchangeable, yet this couldn't be further from the truth. In fact, there are so many flaws in the Big Bang theory that there isn't even enough proof to claim with certainty that it might be true.
