

10 Videos That Prove That Things Just Got Quite A Bit Weirder

Description

Can you feel it? The past several years have been a time of wars and rumors of wars, pestilences, major natural disasters, a global inflation crisis, and a rapidly growing global food crisis. So much bad stuff has already happened, but I have been hearing from so many people that have a feeling that things are about to get a whole lot worse. It is almost as if we are about to reach a major historic turning point and things are about to go to an entirely new level. Unfortunately, it appears that events have already started to really amp up within the past several days. So much is happening all over the globe, and I am going to touch on a number of the most important items in this piece. The following are 10 videos that prove that things just got quite a bit weirder...

#1 Was it another “Chinese spy balloon”? The Pentagon has confirmed that it just shot down another “high altitude object” that was flying over Alaska.

#9 The collusion between the federal government and Twitter to censor free speech was [far more comprehensive](#) than any of us originally realized.

#10 It is being reported that [“part of the sun has broken off and formed a vortex”](#). Scientists are [admitting](#) that they have never seen anything quite like this before.

Talk about Polar Vortex! Material from a northern prominence just broke away from the main filament & is now circulating in a massive polar vortex around the north pole of our Star. Implications for understanding the Sun's atmospheric dynamics above 55° here cannot be overstated! pic.twitter.com/1SKhunaXvP
