

4Chan Has Hunter Biden's iPhone & is Releasing 450GB MORE Private Data Including Passwords — "Ladies & Gentlemen, We are in!"

Description

USA: Researchers on [4Chan](#) have begun examining an offline backup of Hunter Biden's phone. They found the password and are going through all the files.

There is reportedly approximately 450GB of data still remaining hidden on the President's son's iPhone backup log.

The individual who initially released the data claimed to have been threatened by unnamed individuals close to the administration.

“I was told Hunter had sexual relationships with a lot of people in the so-called ‘elite’ and families are ashamed,” said the anonymous individual, adding that ‘the elite’ want to “prevent the humiliation because he f-cked half the kids, sisters and wives in the small ‘elite’ circles.”

The data is alleged to have come from an iPhone backup drive that contained everything from deleted phone calls and text messages, to web-search history including pornography habits.

The data released on 4Chan alleges Hunter Biden searched for porn videos of himself on popular pornography websites, with search terms including “Hunter Biden Fucking a Hooker.”

The alleged documents also show text messages claiming there are “more weapons in your son’s room than in an armory,”
