

**95% of ALL People in Melbourne's Hospitals Are Vaxxed!**

### **Description**

**AUSTRALIA: This bombshell from Australia is going to be top posted for a full week to make good and sure everyone sees it.**

This will be moved down the page on October 6th. **Until then, scroll past this for the latest news.** This is too important to have anyone miss, now we know why so many jobs cannot be filled.

## **KEPT OUT OF THE NEWS AND CONFIRMED TRUE: VAX DEVASTATION IN AUSTRALIA**

**Melbourne's Health Minister Martin Foley Drops Bombshell, 95 percent of ALL people in Melbourne's hospitals are vaxxed, with 78 percent fully vaxxed, and 17 percent partially vaxxed. *How does that add up when less than half the population is vaxxed?***

**I have here more than the short clip that trolls are claiming has been taken out of context, the FULL CONTEXT is here.**

Now we get the truth. The shot is SO BAD it is completely shutting out normal hospital attendance, with the most serious cases admitted. The vax is so bad that only 5 percent of normal hospital visits for things other than vax damage are there now, the 5 percent which represent the most serious normal cases.

**Health secretary Martin says it cleary: Of the TOTAL number of people in the hospital yesterday, 78 percent were fully vaxxed, and 17 percent were partially vaxxed. That leaves only**

5 percent non vaxxed.

**This statement is a stroke of luck to get, because it proves what happened everywhere else, including the United States. *This is precisely why there are so many jobs that no one is filling – the people have been WIPED OUT* and America's con artist doctors, MSM, and big tech buried this. How evil is the American information stream for not reporting this? Play the video and **FIGURE IT OUT.****
