

## AOC: US Needs More Immigration Because Young People Are Not Having Enough Kids

### Description

**USA: Alexandria Ocasio-Cortez says she believes that America needs more immigration because young people are not having enough children.**

She even cited the “burdens of capitalism,” in her defense of unrestrained immigration, saying young people simply cannot afford children in this economic system.

Breitbart reports: “There are quite a few countries that are really struggling because young people, under the burdens of capitalism and living in a society that is increasingly concentrating wealth among the rich, we’re not having kids. Or we’re not having kids at the same rate,” Ocasio-Cortez said.

“And we actually need immigrant populations to help balance things out. We can’t continue to fund social security, Medicare, all of this stuff without immigrants. And it’s always been that way. Don’t act like this is some new trend or anything like that,” she added.

The socialist congresswoman from New York issued her passionate defense of immigration [after she said](#) that migrants are a “blessing” as rent exponentially rises in her own district.

“What a lot of Republican politicians fail to understand is that not everyone shares their zero-sum, scarcity mindset. Many of us understand that immigrants and refugees are a blessing. They have so much to offer our country, & much of our growth as a nation is because of them,” she said after Republican Florida Gov. Ron DeSantis shipped 50 migrants up to Martha’s Vineyard.

“Shout out to Massachusetts and the people of Martha’s Vineyard for showing the world what the best

of America looks like,” she added.
