

Bibi strikes the Earthquake Victims! Syria Accuses Israel of Deadly Missile on central Damascus

Description

Not even the tragedy of an earthquake is capable of stopping the diabolical murderous rampage of Israeli Prime Minister Benjamin Netanyahu.

While the corrupt and hypocritical West continues to invoke human rights for Ukraine, thus justifying the supply of ever more powerful war instruments to make the Weapons Lobby happy, the tormented Syria, guilty of having a president that the USA and its servants of the European Union dislike, is attacked with a missile precisely when it is most fragile due to the tremendous earthquake that struck it.

The explosion would have caused 5 deaths according to the Syrian agency SANA and 15 according to the Syrian Observatory on Human Rights (British anti-Assad NGO which has an interest in emphasizing the successes of the enemies of the Damascus government).

Since 2018, when Gospa News was born, we have reported hundreds of news about the bombings of Israel that only retired commanders have admitted while Jerusalem Government continues to deny them with an attitude of malice and cowardice.

The explosion allegedly took place near an Iranian cultural center. According to Israeli news sources, the attack was aimed at imaginary warehouses of Iranian weapons.

For 5 years, in fact, Israel has maintained that it has the right to shoot against another nation ([whose Golan plateaus it has occupied despite the UN resolution](#) to abandon the territories) due to the presence of the QUDS Forces, the special unit of the Pasdaran paramilitaries of Tehran (Islamic Revolutionary Guard Corps) who helped President Bashar Assad and Russia Army liberate the country from ISIS.

These are war crimes and crimes against humanity. These actions make Netanyahu the worthy heir of another more famous Zionist: Adolf Hitler, author of the Holocaust against the Jews of Eastern Europe in which took part the the Ukrainian Nazis, whose heirs inspired the Maidan square revolution in 2014 in Kiev and the related coup financed by George Soros and some NATO countries.

The US and the European Union are scrambling to protect Ukrainian President Volodymyr Zelensky who legitimized the pro-Russian genocide in Donbass by the neo-Nazis of the Azov Battalion forcing Russian President Vladimir Putin to intervene with a special military operation.

Just the USA and the EU are instead complicit in what is happening in Syria, a civil war planned by the CIA's American counterintelligence since 1983, when Bashar Assad's father ruled.

I am unfortunately convinced that until a nuclear missile hits Rome, Berlin or Washington, these criminal rulers of the West piloted by the New World Order will hardly understand the meaning of the word mercy which, abjuring their Christian roots, they have replaced with the word hypocrisy.

Multiple casualties reported in a “residential neighborhood” of the Syrian capital

by **Russia Today**

At least one missile hit the Kafar Souseh neighborhood of Damascus overnight, severely damaging a residential building and causing multiple deaths and injuries, state news agency SANA reported early Sunday, blaming the Israeli military.

A volley of missiles fired from the occupied Golan Heights targeted Damascus and its surroundings around midnight, and even though Syrian air defenses were activated, at least one of the “hostile” projectiles directly hit a multi-story residential building, the agency said.

At least five people, including one soldier, were killed and another 15 civilians injured in the attack, a Syrian military source told SANA, adding that the “Israeli aggression” led to the “destruction of a number of civilian homes” and other “material damage.”

The building damaged by the explosion

The Israel Defense Forces have not acknowledged the strike, in line with their long-standing policy of not discussing operations outside the country. However, citing a pre-emptive right to self-defense against Iran, **Israel has carried out “hundreds” of bombing and missile strikes against Syria since 2011.** Syria has repeatedly protested the strikes as a violation of its sovereignty, to no avail.

The chasm created by the missile

Sunday's missile strike is the first major attack since a series of devastating earthquakes killed thousands of people in northern Syria less than two weeks ago. The neighboring Türkiye, which suffered unbelievable death and destruction, received more attention and international aid, with rescuers from around the globe flying in to help.

In Syria's case, only a few select nations come to its aid, with the government in Damascus blaming Western sanctions and years of a US-led economic blockade and occupation for exacerbating the crisis and hampering relief efforts.
