

Biden to Harris: Disaster 1 to Disaster 2

Description

USA: That “President” Biden is an unmitigated disaster as our chief executive is so painfully apparent to everyone that it hardly seems necessary to point it out. Nonetheless, just briefly consider:

Catastrophic Governance

His policies — anti-energy, anti-business, anti-military, anti-America First — have wrecked the economy, driven gas to over \$3.00/gallon, given us the absolute worst illegal immigration crisis in our history, and bankrupted the country. In a warped way, it’s kind of impressive that he’s done that in only a bit over four months.

Leadership Vacuum

No one believes Biden is calling the shots. He’s totally malleable to behind-the-scenes operatives, acting in a confused, unknowing fog, reading as best he can from the teleprompter, and hiding behind his weird “I’ll get in trouble if I answer any more of your questions” excuse.
