Bill Gates is Ready to Capitalize on 'The Next Pandemic'

It's no coincidence that Gates has begun marketing his latest Manifesto

As the old says goes: "there's no rest for the wicked."

That's certainly the case with vaccine mogul Bill Gates.

As the world finally gets an opportunity to take a breath easy – after being suffocated by two years of pandemic theatre and 24/7 government and corporate pharmaceutical propaganda, the notorious architect the global COVID-19 'vaccine' roll-out, billionaire tech monopolist turned pharmaceutical scion, **Bill Gates**, is still determined to realize his life's ambition of achieve 100% global vaccine compliance.

To keep the game going, Gates has reemerged from the shadows this week to prepare the public for "the next pandemic."

[CNBC](#) reports...

Bill Gates said Friday that the risks of severe disease from Covid-19 have "dramatically reduced" but another pandemic is all but certain.

Speaking to CNBC's Hadley Gamble at Germany's annual Munich Security Conference, Gates, co-chair of the Bill & Melinda Gates Foundation, said that a potential new pandemic would likely stem from a different pathogen to that of the coronavirus family.

But he added that advances in medical technology should help the world do a better job of fighting it — if investments are made now.

“We’ll have another pandemic. It will be a different pathogen next time,” Gates said.

Initially, Gates had been actively promoting each and every ‘variant’ – constantly talking-up the crisis in order to help maintain the perception of a constant demand for the highly controversial experimental COVID-19 ‘vaccine’ gene-jabs. This includes the most recent media creation known as the “Omicron” variant. But as the public began shunning the booster shots en masse, the media gradually began to abandon the Omicron narrative. Gates has clearly read the propaganda tea leaves, and has since started backtracking from some of his previous positions – and is even admitting that natural immunity is more effective than the dubious pharmaceutical-based *synthetic immunity* he’s been pushing for the last two years through the media and his proxy organizations the World Health Organization (WHO) and the GAVI vaccine alliance.

Two years into the coronavirus pandemic, Gates said the worst effects have faded as huge swathes of the global population have gained some level of immunity. Its severity has also waned with the latest omicron variant.

However, Gates said that in many places that was due to virus itself, which creates a level of immunity, and has “done a better job of getting out to the world population than we have with vaccines.”

In order to further shield him from an increasing public backlash for his role in shamelessly promoting the ‘global pandemic’ and vaccine narratives, Gates has also carefully admitted the existence of comorbidities among the alleged COVID deaths.

“The chance of severe disease, which is mainly associated with being elderly and having obesity or diabetes, those risks are now dramatically reduced because of that infection exposure,” he said.

However, the vaccine kingpin is still lamenting his failure to reach 70% ‘penetration’ of the experimental mRNA toxic injections into the arms of the global population.

Gates said it was already “too late” to reach the World Health Organization’s goal to vaccinate 70% of the global population by mid-2022. Currently, 61.9% of the world population has received at least one dose of a Covid-19 vaccine.

He added that the world should move faster in the future to develop and distribute vaccines, calling on governments to invest now.

“Next time we should try and make it, instead of two years, we should make it more like six months,” Gates said, adding that standardized platforms, including messenger RNA (mRNA) technology, would make that possible.

It's important for people to realize that Gates and his network are not finished in their plan to establish a global conveyor belt for experimental gene-based pharmaceutical injections – and he is already eyeing 'the next pandemic' in order to roll out the next phase of this globalist agenda. There is no shortage of funds either:

"The cost of being ready for the next pandemic is not that large. It's not like climate change. If we're rational, yes, the next time we'll catch it early."

Gates, through the Bill & Melinda Gates Foundation, has partnered with the U.K.'s Wellcome Trust to donate \$300 million to the Coalition for Epidemic Preparedness Innovations, which helped form the Covax program to deliver vaccines to low- and middle-income countries.

The CEPI is aiming to raise \$3.5 billion in an effort cut the time required to develop a new vaccine to just 100 days.

It's no coincidence either that Gates has just begun marketing his latest manifesto entitled, [How to Prevent the Next Pandemic](#).

"I've been following COVID since the early days of the outbreak, working with experts from inside and out of the Gates Foundation who are championing a more equitable response and have been fighting infectious diseases for decades. I've learned a lot in the process—both about this pandemic and how we stop the next one—and I want to share what I've heard with people. So, I started writing a book about how we can make sure that no one suffers through a pandemic ever again."

To mark the occasion, **Gates released this disturbing propaganda video** – littered with many of the staged images and government tropes used to reinforce the COVID 'global pandemic' crisis narrative since the winter of 2020. *Watch:*
