

Bill Gates Tells World Leaders ‘Death Panels’ Will Soon Be Required

Description

Unelected world health czar Bill Gates has told world leaders that it’s time to start talking about “death panels” that sentence ordinary, law-abiding people to death for the crime of being of no use to the elite.

Bill Gates has become so arrogant in recent times that he is happy for cameras to catch him saying the quiet parts out loud.

Terrifying stuff, I’m sure you will agree. Gates doesn’t explain why we can’t pay teachers *and* allow people to live out their lives in peace. Why is it either/or? After all, in the past we didn’t have any problem paying teachers their salaries and allowing our old people to enjoy their grandchildren during their golden years.

This is the brutal, murderous world Bill Gates and his associates at the World Economic Forum are determined to roll out as part of their Great Reset. We can’t allow their evil logic to become the new normal.

If you are wondering what else they have up their sleeve, it’s worth paying attention to what was happening at the G20 in Bali, Indonesia this week.

The G20 is a summit featuring leaders of the most important economies in the world, and it’s a mix of countries considered to be “advanced” or “developing”.

Beyond the rooms where the world political leaders sit around and thrash out various issues, there are dozens of side events where so-called “dignitaries” meet.

As James Melville asked on Twitter, why were Bill Gates and Klaus Schwab in attendance at the G20? No one voted for them. The mainstream media is declaring anyone who asks this question to be a conspiracy theorist. But it’s a totally legitimate question to ask.

@JamesMelville

Why are Bill Gates & Klaus Schwab at the G20? No one voted for them. And anyone who asks this question should not be dismissed as a conspiracy theorist. It's a totally legitimate question to ask.

The world's richest man and new emperor of Twitter, Elon Musk was also in attendance there, just before he completely backtracked on his promises to turn Twitter into a free speech platform. Musk once declared himself a "free speech absolutist." Now he is point blank refusing to reinstate Alex Jones' account and warning that "freedom of speech does not mean freedom of reach."

Musk appeared at the G20 alongside the more established figures of the globalist elite, including Bill Gates and Klaus Schwab, who has already used the forum to instruct world leaders to begin restructuring the global economy in line with the WEF's techno-communist vision.

For his part, Gates is using the forum to instruct world leaders that death panels will be necessary in the near future in order to end the lives of sick and unwell people due to “*very, very high medical costs*”.

Of course Gates’s “death panels” have everything to do with the globalist elite’s obsession with depopulation.

Bill Gates plans for “death panels” mirrors the language used by the World Economic Forum regarding euthanasia and the Canadian government’s devilish new solution to solve inflation, homelessness, skyrocketing crime, and food shortages – euthanasia for the poor.

The Trudeau regime say they are now offering to pay to euthanize people who are “*too poor to continue living with dignity.*”

Canada’s descent into barbarism should come as no surprise. The Canadian government has been completely penetrated by the WEF. Prime Minister Justin Trudeau and his deputy Chrystia Freeland are both WEF Young Global Leaders who have completely sold their soul to Klaus Schwab and his vision for the future.

And make no mistake, that vision involves depopulating the world. The technocrats in charge at the

WEF are so excited by their plan to murder the majority of the world's population that they simply cannot stop talking about it.

At what point do we stop and say "enough"? How many times does the World Economic Forum have to declare their sinister intentions before the world stops and listens?

Klaus Schwab's right hand man Yuval Noah Harari has a history of saying the quiet part out loud, and last month he admitted what many people have long suspected.

According to Harari, who was promoting his new book, the big political question of the 21st century for those in power is "*What do we need so many humans for?*"

And it's not even the first time Yuval Noah Harari has let slip regarding their plans for humanity. He recently declared that the WEF considers the vast majority of the human population to be useless and obsolete.

According to Harari, so-called "*common people*" **are right to be fearful** of a future in which they will be made "*redundant*".

Harari's comments are deeply disturbing because when they are placed in context with comments by other WEF advisors like Bill Gates and his desire for "death panels", it becomes clear that they have mass murder on their mind.

How much evidence is required before a conspiracy theory become a conspiracy fact?
