

## Breaking: Worm Eggs Found In Vials: German Doctors Report Hatching Eggs In Vaxx

### Description

The other day, Karen Kingston argued we should permanently refer to the Pfizer and Moderna vaccines as bioweapons, just like the China virus they were created to “fight.” Now, Dr. Jane Ruby says she has evidence that even more bioweapons are on the way courtesy of EcoHealth Alliance. She’ll be covering that on her show, but she says she can give us an exclusive preview here.

Red Voice Media would like to make a point of clarification on why we do not refer to any shot related to COVID-19 as a “vaccine.” According to the CDC, the definition of a vaccine necessitates that said vaccine have a lasting effect of at least one year in preventing the contraction of the virus or disease it’s intended to fight. Because all of the COVID-19 shots thus far available have barely offered six months of protection, and even then not absolute, Red Voice Media has made the decision hereafter to no longer refer to the Pfizer, Moderna, or Johnson & Johnson substances as vaccinations.
