

CDC director Walensky is INFECTED with covid, after taking FIVE covid “vaccines” that obviously don’t work

Description

USA: Centers for Disease Control (CDC) Director Rochelle Walensky went into isolation on Friday, October 21 due to a positive reading on her latest covid-19 PCR test. CDC senior staff are now tracking down Walensky’s closest contacts and taking the “appropriate action” to monitor her status.

Walensky is currently working remotely and is reporting “mild” symptoms of illness. The term “mild illness” has been used in the corporate media to promote covid vaccines that failed to prevent illness and transmission in public figures who have been vaccinated and boosted several times. The term “mild illness” is subjective and has been used to describe a variety of respiratory illnesses that have lasted from a few days to several weeks long and reoccurring thereafter (as in the case of Joe Biden and Albert Bourla).

Vaccine pushers are trying to promote vaccine efficacy now by claiming the covid jab prevents “severe illness” and only causes “mild symptoms.” In many cases, this is far from the truth. Cases of severe illness, debilitation and death are [recorded in healthy military service members](#) who were mandated to take the vaccines.

CDC’s lockdowns, restrictions, masking, and multiple vaccines all failed

The CDC director is now infected with the very sickness that she tried to avoid for two and half years. Daily mask wearing rituals, nasal probes, and mouth swabs were pointless. Contact tracing and intermittent quarantines were a failure. Physical distancing, persistent hand sanitizer use, and following lines on the floor did not save the CDC director and all the other high level government employees that have gotten sick multiple times anyway. All the CDC's lockdowns, which devastated small businesses and caused mass mental illness, were done in vain. All the child abuse that emanated from the advice of public health experts COULD NOT stop the inevitable infection, nor did any of this mental illness strengthen the innate immune system of the population.

Now, after taking FIVE covid "vaccines" and following all of the obnoxious, asinine protocols, the CDC director is infected with covid. What do these experts have to say for themselves? Will they continue to wear their mask and maintain six feet of social distancing? Will they push for a sixth dose of Pfizer and Moderna's mRNA operating system in 2023?

CDC director received the bivalent booster just a month ago and pushed for kids to get the shots

Just a month earlier, Rochelle Walensky took a photo op at a CVS pharmacy in Brookline, Massachusetts. She was photographed taking Moderna's latest bivalent booster, and she urged others to join in. She told the press that it was critical to get vaccinated ahead of the fall and winter. "I'm here getting my updated fall vaccine because I think it's critically important to do," Walensky said.

"All the data from this new bivalent vaccine have demonstrated that it will protect you against — more likely protect you — against the strains that we have circulating right now, those Omicron BA.5 strains, as well as keep you well protected, because we've seen that some of that protection can wane over time. So, we are really encouraging everybody to roll up their sleeves and get this updated bivalent vaccine," she said.

Rochelle Walensky even encouraged parents to line up their kids for the jab and all the boosters. "We will wait to see what the FDA says about an updated booster vaccine for 5- to 11-year-olds, and we'll make some decisions soon thereafter," she said.

The CDC just voted unanimously to add the covid-19 vaccine and one of its boosters to the childhood vaccine schedule. This schedule is used by the states to mandate vaccines for public school attendance. The state laws also include statutory exemptions, allowing parents to opt out of any and all vaccines for their child's school attendance. However, vaccine manufacturers have been coercing the state legislators to remove these exemptions from the statutes in recent years, subverting the rights of parents and dictating the doctor-patient relationship.

Rochelle Walensky cannot effectively "reorganize" the CDC, as she has promised to do. Under her leadership, the CDC has taken part in mass fraud, human rights abuses, and crimes against humanity. Her next isolation period should include handcuffs and interrogations.
