

## Copenhagen Is Officially The World's 'Safest City'

### Description

The Economist Intelligence Unit has published its [2021 Safe Cities Index](#), ranking 60 major global cities across 76 indicators based on digital, health, infrastructure, environmental and personal security.

**Copenhagen tops the rankings this year with a score of 82.4 out of 100.**

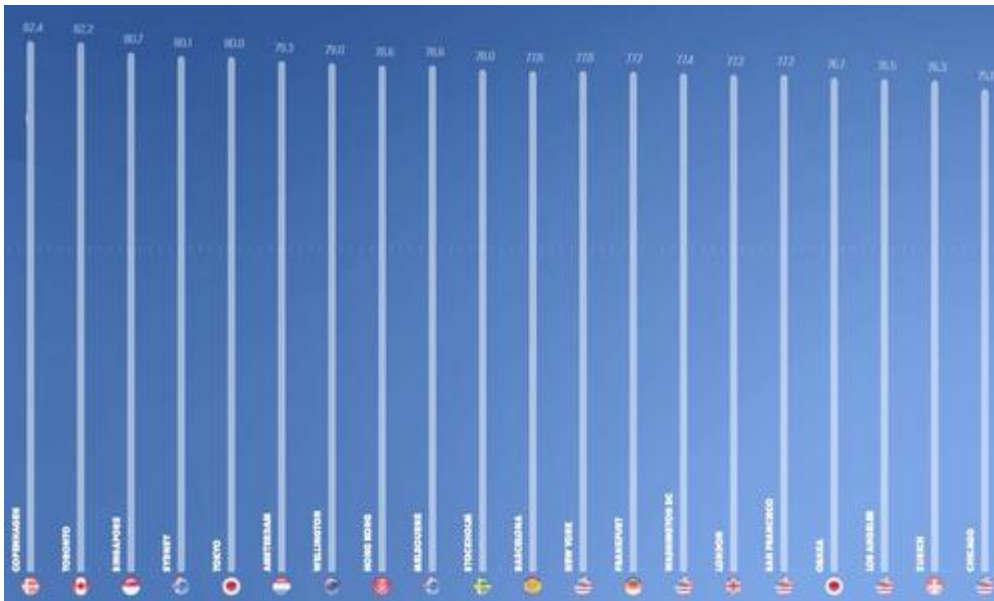

According to the report, “every one of the leading cities overall has a more pronounced relative weak spot. Copenhagen, for example, comes 26th for health security”. The Danish capital does however also place first for personal security.

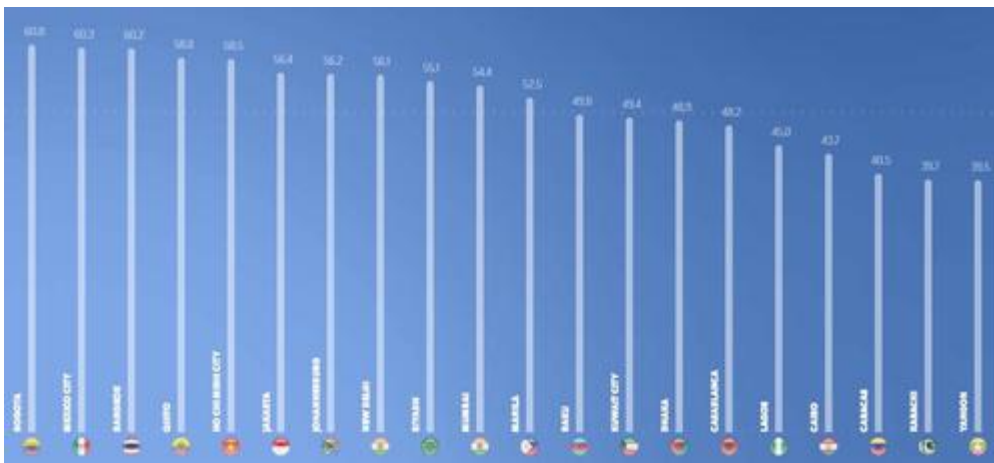

**Cities in the Asia-Pacific region dominate the top-10** with Singapore, Tokyo, Sydney, Hong Kong and Melbourne all present.

While American cities generally lag behind, they perform well in one key area: [digital security](#). Los

Angeles and San Francisco make the top-5 in that category, and perhaps surprisingly **Chicago comes 20th overall...**

At the other end of the scale, **Yangon (Myanmar)** , **Karachi (Pakistan)**, and **Caracas (Venezuela)** ranked the least safest cities in the world...

The least safe cities were dominated by very low scores in health security, infrastructure, and personal security.

**Interestingly, Kabul is not the list.**
