

Covid-19 Jab: They Knew Children Would Die

Description

The epidemic of allegedly unexplained teenage deaths continues to shock us all.

A student in Solihull had the jab, suffered blood clots, had a cardiac arrest and died. A 17-year-old girl died less than 24 hours after a jab. A child died in Essex. Another died in Leicester. And so on.

According to the UK Government's own figures, published on theexpose.uk child deaths are 52% higher than the five year average since the jabbing started. And yet, officially, these are all unexplained. There is an epidemic of coincidental deaths. Perfectly healthy children are suddenly dropping dead. This is something incredibly rare. Tragically, now it is becoming common.

And still the authorities deny the link.

The mainstream media and the medical establishment, their allegiances bought and paid for, refuse to accept the obvious explanation, that these children are being murdered by the unnecessary, experimental jab they're being pressured to take. Myocarditis and pericarditis are repeatedly described as minor inconveniences when in reality they can be deadly and many of those affected will be dead within five years.

An important paper published in the *Journal of the American Medical Association* on 4th August 2021 reported that myocarditis developed rapidly in younger patients, mostly after the second jab whereas pericarditis affected older patients after either the first or second dose. There is talk, predictably, of the under reporting of adverse events. Usually between 1% and 10% of adverse events are reported so the figures are much worse than we think. I've seen a flurry of papers about myocarditis and it seems that only about two thirds of patients can expect a complete recovery. Others may die or have long-term problems. Myocarditis is not, as mainstream journalists continue to insist, a mild and easily treatable disorder. The BBC, in particular, has proved itself utterly shameful.

Back on 31st August in my video entitled 'It will soon be too late for the children' I described what I knew was about to happen. I said then that it was as bad as anything that happened in the concentration camps.

I have repeatedly called for a halt to the plan to jab children. Time and time again I've proved, beyond any doubt, that these experimental covid-19 jabs are unnecessary and dangerous.

Madame Tussauds, the waxworks museum in London, used to have a Chamber of Horrors. They closed it a few years ago. I'm afraid I think they're going to need to reopen it.

My candidates for the old chamber of horrors would have included Jack the Ripper, the Yorkshire Ripper and Haigh the acid bath killer. But there would have been plenty of room for doctors renowned for killing people Dr Crippen, Dr Buck Ruxton, Dr John Bodkin Adams, who allegedly specialised in killing off elderly folk, and the late Dr Harold Shipman – the needle happy GP who killed 236 of his patients.

None of those was responsible for a fraction of the number of people killed by our new candidates for the chamber of horrors. I doubt if even Dr Josef Mengele, the Angel of Death, managed to kill as many children as my candidates have helped to kill and will continue to kill. I mention Mengele in the knowledge, by the way, that I'll be attacked and down-thumbed by a small but surprisingly vocal group of Nazi supporters who wander the internet looking for things to get upset about and always object if I dare say anything critical about their beloved Josef. No one, it seems, is too stupid to be a bigot. Incidentally, and by the by, I also receive racist abuse from Nazis who think I am Jewish. If I were Jewish I could report them to the police because their remarks are invariably anti-semitic and illegal. But I'm not so I can't which is curious.

In my view Whitty and the rest of the UK Government's advisors are all worth their place in any chamber of horrors. It is a disgrace that mainstream media such as the BBC and Channel 4, both little more than government propaganda outlets, has allowed the unforgivably awful, ignorant publicity hound Devi Sridhar to encourage children to be jabbed and to lie to them about the jabs. Sridhar is infamous among thinking people for stating on BBC television that no children had died from the covid-19 experimental jab and that those side effects which did occur were mild and easily treated. Presumably she reckons that myocarditis can be treated with one of those magic sponges used by the first aid staff who run onto the pitch during football matches and perform miracles –turning the mortally wounded into fit and able players with one squeeze of the sponge. And the promise of a couple of aspirin tablets later. Myocarditis and pericarditis and clots and strokes and blindness are not minor side effects to be dismissed. And nor is death.

Dr Harold Shipman's record looks positively anaemic against the total which I believe we will eventually be able to lay at the door of Whitty, Fauci and Sridhar.

Then there are the politicians who deserve to be in the new Chamber of Horrors. We wouldn't be able to cram in all the dirty dealing politicians who deserve their place in history but in the UK the truly awful Johnson, Hancock and so on deserve a cage of their own. Biden and Johnson are essential and no chamber of horrors would be ready for public view without dummies representing the uniquely awful Trudeau and the pathetic little Macron. And that woman from New Zealand, the one who seems to be chums with Bill Gates. And just about everyone in Australia who holds any sort of official position in the Government or administration needs to be in there. Isn't it strange how the old Commonwealth countries now appear to be the most repressive? We can doubtless thank the influence of the crown for this. Queen Elizabeth, Charles and William have betrayed everyone and sold us out for a seat at the table when the world is carved up into profitable fiefdoms.

And there has to be a spot in the Chamber of Horrors for media doctors who either knew the truth but didn't want to annoy employers who didn't want them sharing it, or who simply didn't bother to do any research of their own and recited the garbage they were fed without a thought for the deaths they were causing. I've lost count of the number of journalists and media doctors who simply recited the lies they were fed. They'll all be lined up on trial at Nuremburg Mark II – alongside the doctors, nurses and others who've been jabbing the innocent and the unwary with an experimental, toxic brew that only has temporary approval.

We'd also need a special annex for media institutions such as the BBC, ITV, Channel Four and Sky – all of which betrayed their viewers and listeners. And another special annex for newspapers such as the *Guardian* and the *Daily Mail* which weren't content to publish lies but which also felt the need to denigrate those telling the truth.

And there will be room for a few celebrities. Clooney deserves a spot for suggesting that those wise enough to refuse the jab should be jabbed anyway.

And, of course, we'll have to cram in the entire staffs of YouTube, Google, Facebook, Twitter, LinkedIn and Wikipedia. All of whom proved themselves to be true and faithful servants of the evil manipulators determined to force Agenda 21, the Great Reset and a World Government upon an unwilling world. I wonder how many of the rank and file at those wretched companies realise that they too are doomed if the evil ones succeed in winning this war.

I first warned about mandatory vaccinations in March 2020. It was clear then, over eighteen months ago, that the covid-19 hoax was going to lead us into a compulsory programme of injections – though it wasn't clear then that the jabs would not be traditional vaccines. It was also clear then, in March 2020, that covid-19 was just the rebranded flu. The figures subsequently proved this conclusively.

On the 4th December 2020, in a video entitled 'Vital Information about the covid-19 vaccine' I reported that the Bill and Melinda Gates Foundation, massive investors in the vaccine industry, had given the UK's regulators, the MHRA, £980,000. Coincidentally, the UK became one of the first countries to authorise the use of the jabs.

It was nearly a year ago that Matt Hancock, the disgraceful but not yet then publicly disgraced, minister responsible for covid, warned that people might not be allowed to enter cinemas or watch football matches if they didn't agree to be jabbed. It was the first official warning that vaccine passports would be introduced and that huge swathes of the population would be disenfranchised.

A few days later, on the 8th December 2020, I made a video listing the side effects which were already known to be associated with these jabs: transverse myelitis, convulsions, strokes, heart attacks, myocarditis, pericarditis, blood clots and so on. Take a look at that video entitled 'Covid-19 Vaccine – Possible vaccine side effects'. It was first shown on the 8th December 2020. Fauci and Whitty and the medical establishment knew back then what the jabs would do. And they knew the adverse events weren't rare. No one can possibly say they weren't aware. In early December 2020 – ten months ago – I described the jabbing as the biggest experiment in history – and largely unregulated. The politicians sneered, the journalists sneered and the medical establishment sneered. And they were all wrong. On 9th June 2021, I made a video entitled 'Lies on the BBC Will Result in Children Dying'. And back on 13th March I made a video entitled 'Covid-19 Vaccines are weapons of mass destruction and could wipe out the human race'. These and others are all still on Brand New Tube.

Look at what is happening now.

Children are dying at school and at home. The deaths are all listed as sudden – with no known cause. The authorities still dare not admit it, of course, but they are involved in a huge genocidal programme. Politicians, advisors, doctors, nurses and journalists are involved in a deliberate programme of child slaughter.

One of the few growth industries in the world is now the provision of bereavement counselling to children, parents and school teachers. The BBC, that repository of covid absurdity, has reported that there have been calls to have defibrillators fitted in all schools because of the unusual epidemic of sudden death among previously perfectly healthy children.

It must be difficult for the authorities and the medical establishment to continue trying to hold the dam against the continuous flood of information proving that they are wrong and that we are right.

It must be a struggle for some of those half-wits to have to continue selling a plague that never was. Even establishment doctors now agree that most people now have immunity to covid-19 and that any virus which existed will now be weaker

. The evil ones persist with the lies and the misinformation about covid-19 in order to provide some cover, some excuse, for the number of people dying from the jabs.

'Long covid', of course, is an everlasting excuse for the side effects resulting from all the jabbing. And having demoralised and weakened nations with their absurd policies of mask wearing, social distancing and jabbing they are now working hard to flog jabs to protect us against flu.

No one in the medical establishment seems to care that the attenuated live virus used in the nasal flu vaccine now being offered to children can become live and kill off elderly folk weakened by the covid-19 jabs and by absurd and indefensible governmental rules and regulations and by months deprived of sunshine. Just what havoc the attenuated live virus will wreak on the parents and grandparents who

have been given the experimental covid-19 jab is too awful to contemplate. There will be many more unexpected deaths in the next few months – among both young and old – as the genocide gets under way with a vengeance.

On 2nd February I recorded a video entitled `Doctors and nurses giving the covid-19 vaccine will be tried as war criminals'. On 20th April of this year I made a video entitled `A syringe full of death'.

And still the abuse kept coming from mainstream media and from trolls on social media. But the medical profession, the politicians and the journalists ignored the evidence, denied the facts, suppressed the truth, demonised the truth tellers and pushed and bullied millions into accepting a dangerous experimental jab that didn't do what everyone was told it did and wasn't necessary anyway.

Over the last twenty months, I've been lied about and libelled more times than I can count – often by people who should have known better. My reputation has been trashed and my career has been destroyed. It has been painful and damaging and expensive.

But I like to think I'd do it all again.

Because never in history has there been a crime of this magnitude.

No Chamber of Horrors will be big enough to hold the armies of liars and deceivers who will, in due course, be punished as enemies of mankind.
