

Covid Scam, NATO Wars, Green Extremism: The Tyrannical Trifecta From Hell

Description

Everyone feels it, but not everyone sees it: America's greatest threat is not from Russia or China or from any other foreign government. America's greatest threat is from our own government in Washington, D.C. When will the American people get that through their heads?

The globalist devils inside the Beltway manufactured and implemented the Covid scamdemic: the greatest act of tyranny inside U.S. borders since Lincoln invaded the South.

The globalist devils inside the beltway have turned Europe and the world into a giant military encampment with U.S. and NATO bases on the doorsteps of almost every country on the planet, which only incites nations to retaliate.

And the globalist devils inside the beltway have turned U.S. energy policies over to an extremist Green agenda that if fully implemented will turn the greatest nation to ever exist into a third world country. In fact, America is already headed in that direction.

From the *Mises Wire*:

When people start freezing to death in Europe this winter, who will be blamed?

Regulations, Russia, the North Atlantic Treaty Organization? They all will be, but no one with a recognizable face or name will pay any price.

The war fueled by the US and NATO's expansionism and military involvement in Ukraine has worsened Europe's energy problem. In Poland, citizens are lining up in their cars a mile from coal mines to buy enough fuel to prepare for winter. Due to the increased demand caused by the European Union's embargo on Russian coal, Polish families worry they won't have enough for the cold season.

"This is beyond imagination; people are sleeping in their cars," Artur, 57, a pensioner, told Voice of America.

"I remember the communist times, but it didn't cross my mind that we could return to something even worse."

Prior to the embargo, Poland was under pressure from EU environmental policy. To Polish families that rely on coal, Russian imports were a household staple due to lower costs. With Poland banning coal from Russia, locals must rely on coal from Polish state-controlled mines, which have rationed sales recently due to the high demand.

On a recent *Tucker Carlson Tonight* episode, the Fox News host covered the struggle of Europeans trying to secure heat for winter.

Carlson highlighted countries like Germany and Poland, which are running out of fuel, forced to rely on coal or even timber. Could this imminent energy calamity have been prevented? Carlson explained:

Green energy cannot replace fossil fuels. Not now, not anytime soon. Fossil fuels remain what they have always been: the key to civilization.... So-called green energy is not close, is nowhere near replacing gas and oil and coal. It's measurable. We could have known this. Anyone with eighth-grade math skills could have figured out in about 10 minutes that we cannot replace fossil fuels with renewables or green energy and of course, they must have known that.

While Carlson is right that the EU's obsession with the so-called green economy is coming back to haunt it, he left out that America's decades-long policy of foreign intervention has played just as great a role in the current crisis.

Ron Paul has long warned of the risks associated with NATO expansion. In 2008, then representative Paul voted against a bill meant to encourage Ukraine and Georgia to join NATO.

At the time, Paul explained his vote with the following message:

NATO is an organization whose purpose ended with the end of its Warsaw Pact adversary.... This current round of NATO expansion is a political reward to governments in Georgia and Ukraine that came to power as a result of US-supported revolutions, the so-called Orange Revolution and Rose Revolution.

Providing US military guarantees to Ukraine and Georgia can only further strain our military. This NATO expansion may well involve the US military in conflicts unrelated to our national interest.

The US support for NATO membership for Ukraine continues. Russia did not want to risk seeing this come to fruition and engaged militarily as a result. Biden is also personally involved, as he was a key player in turning NATO into what it currently is.

In 1998, then senator Biden voted in favor of expanding NATO to include Poland, Hungary, and the Czech Republic, stating that this move would be "the beginning of another 50 years of peace."

As Paul wrote recently, Biden was quite off.

Unfortunately, as we have seen this past week, my fears have come true. One does not need to approve of Russia's military actions to analyze its stated motivation: NATO membership for Ukraine

was a red line it was not willing to see crossed. As we find ourselves at risk of a terrible escalation, we should remind ourselves that it didn't have to happen this way. There was no advantage to the United States to expand and threaten to expand NATO to Russia's doorstep. There is no way to argue that we are any safer for it.

Amen!

America's constant meddling, interventions, trade sanctions, false flags, forced regime changes, political assassinations, breaches of state sovereignty, bombing campaigns, clandestine terror campaigns and proxy wars around the world have created the vast majority of global conflicts and domestic recessions since at least World War II.

Conservatives and Christians twice, in 2008 and 2012, had an opportunity to nominate a true constitutionalist and patriot, a true pro-peace non-interventionist and a true Christian gentleman, Dr. Ron Paul, for President of the United States. Instead, they stupidly rejected Dr. Paul's candidacy and chose two of the most controlled and corrupt politicians in modern history: John McCain and Mitt Romney.

Look what's happened since.

America now has undoubtedly one of the most amoral, inept, incompetent and criminal governments, not only in the world today but in world history!

And as far as the mainstream media goes, it is truly nothing more than a Ministry of Propaganda for the Deep State.

And speaking of the Deep State, conservatives everywhere love condemning it—and talking about Klaus Schwab, Bill Gates, George Soros, Henry Kissinger, et al.—but almost none of them ever mention the sizeable influence within the Deep State exerted by Zionist Israel. But you'll never truly understand the Deep State if you do not understand the immense influence that Israel wields over it. For starters, just take a peek at who controls the Federal Reserve.

I would like to believe that things would get better if Republicans took control of Congress this November and the White House in 2024, but the harsh reality is Republicans have a masterful way of talking a lot while changing almost nothing.

I have no confidence in politicians from either party having the courage to make the hard decisions that would help correct the direction of our ship of state from the path of destruction that it's currently on.

It would help tremendously if America's pastors would step up to the plate and demonstrate some courageous leadership. But they have already proven what they are willing to do: NOTHING!

The Covid scam, NATO wars and Green extremism are the tyrannical trifecta from Hell. Defeat these three satanic attacks against our liberties, and you will solve a host of problems, not the least of which is inflation and our overall economic malaise.

The Covid tyranny has already doomed the lives of millions who foolishly took the jabs and forever enslaved the minds of millions more. The expansion of NATO and America's perpetual war agenda has brought us to the precipice of nuclear war. And if allowed to grow into maturation, the Green

agenda will do as much—if not more—damage to our country than nuclear war.

Looking back, I wonder if Ron Paul's candidacy was America's last opportunity to set its ship of state aright. In a spiritual sense, when Christians and conservatives rejected Dr. Paul, they rejected the Biblical Natural Law principles that he represented.

At some point, the chickens come home to roost—even for America.
