

## Covid Truths: “Hot Lots” – Deadly Batches of Vaccines

### Description

**A study has surfaced, the results of which are terrifying. A researcher at Kingston University in London, has completed an extensive analysis of the VAERs data (a subdepartment of the CDC which collects voluntary vaccine complication data), in which he grouped reported deaths following the vaccines according to the manufacturer’s lot numbers of the vaccines.**

By [Russell L. Blaylock](#), 22 April 2022

Vaccines are manufactured in large batches called lots. What he discovered was that the vaccines are divided into over 20,000 lots and that one out of every 200 of these batches (lots) is demonstrably deadly to anyone who receives a vaccine from that lot, which includes thousands of vaccine doses.

He examined all manufactured vaccines—Pfizer, Moderna, Johnson and Johnson (Janssen), etc. He found that among every 200 batches of the vaccine from Pfizer and other makers, one batch of the 200 was found to be over 50x more deadly than vaccine batches from other lots. The other vaccine lots (batches) were also causing deaths and disabilities, but nowhere near to this extent. These deadly batches should have appeared randomly among all “vaccines” if it was an unintentional event. However, he found that 5% of the vaccines were responsible for 90% of the serious adverse events, including deaths. The incidence of deaths and serious complications among these “hot lots” varied from over 1000% to several thousand per cent higher than comparable safer lots.

If you think this was by accident—think again. This is not the first time “hot lots” were, in my opinion, purposefully manufactured and sent across the nation—usually vaccines designed for children. In one such scandal, “hot lots” of a vaccine ended up all in one state and the damage immediately became evident. What was the manufacturer’s response? It wasn’t to remove the deadly batches of the vaccine. He ordered his company to scatter the hot lots across the nation so that authorities would not see the obvious deadly effect.

All lots of a vaccine are numbered—for example, Modera labels them with such codes as 013M20A. It was noted that the batch numbers ended in either 20A or 21A. Batches ending in 20A were much more toxic than the ones ending in 21A. The batches ending in 20A had about 1700 adverse events, versus

a few hundred to twenty or thirty events for the 21A batches. This example explains why some people had few or no adverse events after taking the vaccine while others are either killed or severely and permanently harmed. To see the researcher's explanation, view the video by following this [LINK](#). In my opinion, these examples strongly suggest an intentional alteration of the production of the "vaccine" to include deadly batches.

I have met and worked with a number of people concerned with vaccine safety and I can tell you they are not the evil anti-vaxxers you are told they are. They are highly principled, moral, compassionate people, many of which are top researchers and people who have studied the issue extensively. Robert Kennedy, Jr, Barbara Lou Fisher, Dr. Meryl Nass, Professor Christopher Shaw, Megan Redshaw, Dr. Sherri Tenpenny, Dr. Joseph Mercola, Neil Z. Miller, Dr. Lucija Tomjinovic, Dr. Stephanie Seneff, Dr. Steve Kirsch and Dr. Peter McCullough just to name a few. These people have nothing to gain and a lot to lose. They are attacked viciously by the media, government agencies, and elite billionaires who think they should control the world and everyone in it.
