

CV19 Vax Catastrophe is Murder – Dr. Pierre Kory

Description

World renowned CV19 critical care and pulmonary expert Dr. Pierre Kory is now running a full-time CV19 vaccine injury practice. With more than 675 million CV19 bioweapon/vax injections in America alone, he has a lifetime of work ahead of him. Kory says, “We live in a country where there is a humanitarian crisis unfolding, and it’s being kept a secret. . . . Most of society is just humming along thinking vaccines are ‘safe and effective,’ and they don’t understand that these vaccines were a humanitarian catastrophe. It really affected the health and the survival of us as a country. In a two-year period, the average life expectancy of Americans went from 79 years old to 76 years old. Who has to die to produce that kind of reduction? It’s not 80-year-olds who are dying. It’s young people dying that drives such a change in our average life expectancy.”

Dr. Kory says this is no small medical mistake that produces this sort of “unfolding humanitarian catastrophe.” Dr. Kory is out with a new book called **“The War on Ivermectin.”** Dr. Kory contends it was not only a war on Ivermectin but a war on doctors who wanted to use it. Dr. Kory says, “They have the tools to punish you locally, regionally and, in my case, on the national level. It really was a war on good doctors.”

Ivermectin was one of the drugs Dr. Kory and others were promoting and using for early treatment of Covid, but the doctors who used it were punished and shouted down by Big Pharma and the bought-and-paid-for medical community. Dr. Kory says, “We had the data by mid-2020 to late 2020. There was enough data to tell you to use Hydroxychloroquine and Ivermectin in combination. Had that been the national protocol, the hospitals would have emptied, and the market for Remdesivir would have disappeared. You get what I am saying? There would have been no global CV19 vaccine campaign. There would have been massive ‘vaccine hesitancy.’ Who is going to line up for a shot when you know this is a small illness you can treat with a couple of safe drugs?”

According to Dr. Kory, Big Pharma and the medical community are still restricting the use of things like Ivermectin, and they are still punishing good doctors trying to help their patients. The “war” is ongoing.

Kory says this is not just a humanitarian catastrophe but crimes against humanity. Kory explains, “You can see it in the depraved actions of the regulatory agencies and the way they ignored the deaths, side

effects and adverse events in the VAERS (Vaccine Adverse Event Reporting System) data base. You can see it in the way they promoted vaccine data that is completely fraudulent and faulty. Yes, these are crimes. These are crimes. To tell lies that result in the death of someone, because of your lies and being in position of authority and you killed someone as a result of those lies, that sounds like a crime to me. It sounds like some sort of homicide . . . or manslaughter or murder. I am not a lawyer, but there are people who propagated lies that lead to the deaths of others.”

There is much more with Dr. Kory in the 51-minute interview.
