

Democrats demand “abortion tents” in national parks to mass murder American babies on federal land; Sen. “Pocahontas” Warren thinks federal butchery of Native Americans didn’t go far enough

Description

USA: Left-wing abortion zealots want to set up “abortion tents” across America’s national parks in red states so that baby murder can continue to be carried out against America’s babies in contradiction to the recent *Roe* decision rendered by the US Supreme Court.

This bizarre, horrific idea would make national parks — where Americans typically bring families to enjoy nature together — a “baby butchery factory” where people come to murder their future families and end lives.

No doubt the Biden regime will even call it “recycling” by spreading the gory remains of the butchered babies across those national parks, claiming it’s “nitrogen for trees.” (This is the green movement in a nutshell.)

How fitting that Sen. Elizabeth — also sarcastically known as “Pocahontas” — seems oblivious to the history of the US federal government butchering Native American men, women and children on what is now “federal land.” Apparently, Sen. Warren doesn’t think the butchery of the Native American Indians went far enough.

I just spoke with [@ewarren](#), who suggested the Biden administration establish Planned Parenthood outposts on the edges of national parks.

“They could put up tents, have trained personnel — and be there to help people who need it.”

“It’s time to declare a medical emergency.”

The solution to everything, in the minds of Democrats, is either more money printing or more mass

murder, it seems.

As I posted on Telegram today at the RealHealthRanger channel:

I covered this in my podcast today: Lunatic Dems want Biden to set up #ABORTION TENTS in national parks in red states, so that Americans could enjoy drive-through baby butchery on federal lands.

Sen. Liz Warren is all in favor of this, apparently oblivious to the fact that the US federal government has already butchered men, women and children on so-called "Federal lands" — it was the butchery of NATIVE AMERICANS!

Apparently she thinks more butchery is still needed.

Democrats demand mass murder stations be installed across America and run by the government to exterminate American babies

Anybody paying attention now knows that the US government is waging an extermination war against the American people. The SARS-CoV-2 gain-of-function research was all part of building bioweapons to snuff out life, and the covid vaccines were of course designed to achieve mass depopulation and infertility.

Abortion was always a huge part of their depopulation plan, especially when it targeted blacks above anyone else. But now with *Roe vs Wade* overturned, the genocidal maniacs running the illegitimate US government are scrambling to find ways to keep the medical murder going, even if it means turning America's national parks into baby butchery centers.

Before long, the entrance to Yellowstone National Park will have two lanes. One lane will say, "To enjoy nature with your family" and the other lane will say, "To murder your family and violate nature."

We wouldn't even be surprised if Joe Biden and the Democrats announced gay sex monkeypox festivals across America's national parks, inviting youth to be raped, molested and sodomized by LGBT cultists, claiming legal immunity since they're on "federal property." Will America's national parks soon fly the LGBT rainbow flag, a symbol of Satan?

There's even talk of US military bases being turned into abortion factories, placing the Pentagon in the role of exterminating Americans. This shouldn't surprise anyone, since the plan all along has been to turn the US military against the American people. This is why the "woke" Pentagon is aggressively purging Christians and conservatives from the ranks, of course.

Under Biden, you can smoke crack but not vape; you can butcher children but not protect them from butchers

In addition to running baby butchery camps across America, the US DOJ also runs drug addiction areas where DOJ employees watch junkies shoot up with heroin and meth. The DOJ even helps fund

crack pipes to be handed out to the public for free. See my story, “Racist Biden regime distributing \$30 million to blue cities for CRACK PIPES to be handed out to Black Americans and LGBT.”

As this is going on, the FDA bans Juul vaping devices, because according to the government, **vaping is bad but smoking crack is good.**

Giving birth to a living baby is also considered bad by the frothing, satanic Left that wants to murder, rape, groom or mutilate every living child they can get their demonic hands on. Murdering a child is celebrated by the Left, including the lunatic Senator Elizabeth Warren, who pretended to be a “Woman of Color” to advance her academic and political career, even though she knew all along that she was lying and didn’t have a drop of Native American blood in her.

She does have plenty of blood on her hands, though, with her incessant pushing of organized, institutional child murder and infant mutilations, which are part of the typical abortion procedures carried out by Planned Parenthood.

Like nearly all elected Democrats, Sen. Elizabeth Warren is complicit in the mass murder of millions of human babies, and she is committed to using the full force and coercion of the bankrupt US federal government to maximize depopulation, genocide and ethnic cleansing in America. And if she can’t manage to murder your baby, she’ll subject your children to Drag Queen Story Time and LGBT molestation / mutilations and rape through the public school system.

These Democrats are child predators, and they are 100% aligned with Lucifer in their thirst for human blood and their desire to destroy all children because children reflect the creation of God.
