

DeSantis: Fauci In Witness Protection? Culprits Desperate To Shield Themselves From COVID Boomerang [VIDEO]

Description

USA: During the COVID-19 pandemic, many states decided to follow the guidelines set by the Biden administration and the CDC. While Democratic strongholds pushed lockdowns, mask mandates, the COVID-19 jab, and vaccine passports, the coronavirus continued to spread. It appeared that more protocols and mandates put in place did little to stop COVID-19 or its several variants from sweeping the nation. But while the Democrats promoted more government overreach, one state refused completely and, thanks to the leadership of Governor Ron DeSantis, Florida is thriving.

Not letting hysteria control his decisions, DeSantis has been adamant from the beginning on allowing science and facts to guide his path through COVID-19. Now that science has shown that lockdowns, masks, and even the supposed miracle drug did little at stopping the virus, DeSantis explained how those behind the COVID-19 agenda are quickly changing the narrative, hoping to shield themselves from the backlash.

Take a look.

Focusing on how the science has never changed, only the narrative, Governor DeSantis admitted, “There’s been no change in the underlying science. The ineffectiveness of those policies was apparent long ago. The destructiveness of those policies was apparent long ago.”

[Contact us](#) for guidelines on submitting your own commentary. Red Voice Media would like to make a point of clarification on why we do not refer to any shot related to COVID-19 as a “vaccine.” According to the CDC, the definition of a vaccine necessitates that said vaccine have a lasting effect of at least one year in preventing the contraction of the virus or disease it’s intended to fight. Because all of the COVID-19 shots thus far available have barely offered six months of protection, and even then not absolute, Red Voice Media has made the decision hereafter to no longer refer to the Pfizer, Moderna, or Johnson & Johnson substances as vaccinations.
