

Doctor Cites 'Whistleblowers' Inside CDC Who Claim Injections Have Already Killed 50K Americans

Description

USA: The most highly cited physician on the early treatment of COVID-19 has come out with an explosive new video that blows the lid off the medical establishment's complicity in the unnecessary deaths of tens of thousands of Americans.

Dr. Peter McCullough said these deaths have been facilitated by a false narrative bent on pushing an all-new, unproven vaccine for a disease that was highly treatable.

He said COVID was a bioweapon and the vaccines represent "phase two" of that bioweapon.

"As this, in a sense, bioterrorism phase one was rolled out, it was really all about keeping the population in fear and in isolation and preparing them to accept the vaccine, which appears to be phase two of a bioterrorism operation," McCullough said in a June 11 webinar with German attorney Reiner Fuellmich and several other doctors.

He noted:

Both the respiratory virus and the vaccine delivered to the human body the spike protein, the gain of function target of this bioterrorism research.

"Now I can't come out and say all this on national TV today or at any time," he continued. "But, what we had learned over time is that we could no longer communicate with government agencies. We actually couldn't even communicate with our propagandized colleagues in major medical centers, all of which appear to be under a spell, almost as if they are hypnotized right now."

He did not hold back in his criticism of his colleagues in the medical community.

And doctors, good doctors, are doing unthinkable things, like injecting biologically active messenger RNA that produces this pathological spike protein into pregnant women. I think when the doctors wake up from their trance they're going to be shocked to think what

they've done to people.

McCullough is professor of medicine and vice chief of internal medicine at Baylor University and also teaches at Texas A&M University. He is an epidemiologist, cardiologist and internist and has testified before the Texas State Senate related to COVID-19 treatments. He holds the distinction of being the most widely cited physician in the treatment of COVID-19 with more than 600 citations in the National Library of Medicine.

In the video, recorded by [Oval Media](#), McCullough said:

The first wave of the bioterrorism is a respiratory virus that spread across the world, and affected relatively few people—about one percent of many populations—but generated great fear.

He said the virus targeted primarily people over 50 with multiple medical conditions. It poses almost no risk to children.

He said 85 percent of the more than 600,000 U.S. deaths could have been prevented with a multi-drug treatment given in the early to mid-point of the disease.

Instead, people were told to stay home and not return to the hospital unless their symptoms got worse, such as severe breathing problems. By then it was too late for many. They were placed on ventilators and died.

The vast majority of doctors jumped in lockstep to follow these erroneous “guidelines” handed down by the World Health Organization and the U.S. Centers for Disease Control. Those guidelines neglected to place any focus on the treatment of sick patients and, from the beginning, as early as April 2020, started emphasizing the need for a vaccine as the only real hope of beating back the virus.

The federal Vaccine Adverse Event Reporting System [VAERS] logged 5,993 reports of deaths of people injected with the COVID vaccine between Dec. 14, 2020, and June 11, 2021. That’s more than all the deaths reported to VAERS from all other vaccines combined over the last 22 years.

But these numbers, as shocking as they are, don’t scratch the surface of the actual number of dead Americans, said McCullough.

We have now a whistleblower inside the CMS, and we have two whistleblowers in the CDC. We think we have 50,000 dead Americans. Fifty thousand deaths. So we actually have more deaths due to the vaccine per day than certainly the viral illness by far. It’s basically propagandized bioterrorism by injection.

McCullough added that “every single thing that was done in public health in response to the pandemic made it worse.”
