Why is President Trump pushing the vaccine, and what do people have to do if they're already vaccinated?

We have an interview with Greg Hunter and Cliff High for the second question!

Cliff High in 2018 stated that Bitcoin would rise to \$64,000 and then stop. It would be the \$64,000 dollar question, and then it would drop by about half of its value before heading back up again to \$100,000.

You need to know that Bitcoin in that time was \$3,000, and no one ever thought it would ever surpass \$20,000.

Last month happened precisely that, it jumped to \$64,000, and then stopped and fell to \$30,000. Amazing!

Cliff explains the harmful effect that spike protein has on our body and discusses the C60 power and why you should consume it.

You need large doses of the right kind of Vitamin C, 10-15,000 IU's of Vitamin D to maintain certain blood levels, and then Clif recommends C60 too.
