

Dr. Carrie Madej – Covid mRNA Vaccines altering our DNA – and what is ‘Luciferase’

Description

Luciferase, interesting name. I get it, a variety of organisms have light emitting reactions, so Lucifer, the lightbearer. But come on...~TS

From [Wikipedia](#):

“Luciferase is a generic term for the class of oxidative enzymes that produce bioluminescence, and is usually distinguished from a photoprotein. The name was first used by Raphaël Dubois who invented the words luciferin and luciferase, for the substrate and enzyme, respectively.[citation needed] Both words are derived from the Latin word lucifer – meaning lightbearer.”
