

## Dr. Tau Braun: The ZOMBIE APOCALYPSE is here – and it is known as VACCINE INJURY

### Description

The [zombie apocalypse](#) is already happening and it is known as vaccine injury.

Dr. Tau Braun, a clinical psychologist and United States National Counterterrorism and Emergency Management advisor, made this claim in an interview with James Grundvig during the April 6 episode of “Unrestricted Truths: Defcon 5” on the *American Media Periscope* network.

According to Grundvig, the *Centers for Disease Control and Prevention* (CDC) has been involved with the military and with zombie apocalypse predictive programming for a long time now and they are preparing the American people for a zombie pandemic.

Grundvig and his co-host Josh Reid discussed with Braun why the human race is going to become zombies and how it is connected to the Wuhan coronavirus (COVID-19) vaccines.

“The zombie apocalypse is already happening. It’s called vaccine injury. It’s already happening to these folks that are calling themselves, for the most part, long haulers,” Braun said.

Long haulers refer to people who have long COVID. Braun noted that the list of long haulers is becoming shorter because the recovery time to get over the exposure to the COVID-19 chemical and biological weapon is different from having it placed into a lipid nanoparticle. This highly charged cationic lipid nanoparticle put into the human body is moving through every organ to escape the human immune system.

## Humans are now in some form of zombie fight

Braun pointed out that a purposeful attack using low-grade, tranquilizer-like vaccines has been done to control the behavior of the population.

“And in some way, this is like spraying over a population with human beings. And we’re all in some form of zombie fight at the moment. We are not ourselves. We’re not reacting in the same way. Our

behavior is sluggish for the amount of threat that we are under,” Braun said. “We are the proverbial deer in headlights and it’s everywhere because the spike protein is now ubiquitous. So, we are constantly having to fight that effect of zombification.”

The clinical psychologist noted that the biology of someone injured by the vaccine is comparable to someone who has been envenomed. The venom in the vaccine is replicating the effect of hibernation and putting people into a form of suspended animation, or a zombie state.

While in this zombie state, the venom replicates the spike protein, which copies parasitic-like behavior as it reproduces in the human body that is switched off in the hibernation process. “Think about all the things that we’re going to need to counteract living human beings that have essentially lost their souls,” Braun said.

Reid warned the viewers that this agenda is going to be pushed on the American people. He said another plandemic is coming at some point and the people behind it are getting everybody prepared for the digital slave system.

Watch the video below to know more about the zombie apocalypse that is happening now in America.
