

Dr. Zelenko Discussion On C-19 Agenda And The Push To Vaccinate More People!

Description

USA: The White House stated that from the start of the Biden admin, Biden had given \$800 Million to help assist Ukraine in the conflict with the Russian military, but the total would be \$2 billion.

However, it didn't matter because the world stood one with Ukraine as Putin continued his assault.

The Dems wear blue and yellow, but Dr. Zelenko doesn't have the same love and support as he raised his voice against the C-19 plan forced on Americans and the world population.

Dr. Zelenko was on The Mel K Show to talk about the C-19 agenda and the promotion to get people to take the shot.

The WH supports the vaccinated people with Pfizer and Moderna.

But, the doctor confessed, *"The damage was quite severe, dose-related. Like the more shots you take, the more damage there is to your immune system. So if you did it once, don't do it again. By the way, we knew through hacked Pfizer and Moderna documents that many numbers were all different in contents. In other words, one of the jobs of the FDA is to ensure that someone in one part of the country is getting the same thing that someone in another part of the country is getting. Meaning substances uniform, and everyone's getting the same thing. And it should be something that has been medically necessary and works safe. But what they have done is create a whole series of different formulations, different concentrations, and different ingredients. And so not everyone got the same."*

The host asked, "By why would they do that?"

"I'll tell you why. Some of the lots were 5,000% more lethal than others, or think of it as 50x. So let's say one vial killed one person. Another vial killed 50 people. That's in terms of lethality. If everyone would have gotten the same thing, it'll be clear in a clear correlation that you're being poisoned, and no one will take it. But the most common question I got was, well, I know these people, and they're okay. And the answer is yeah because not everyone got the same thing."

Dr. Zelenko answered.

We have to emphasize the side effects that have been documented, and the FDA still approved another booster shot for people 50+.
