

Emboldened IRS demands new hires be willing to KILL AMERICANS ... see IRS rifle team training photos and more

Description

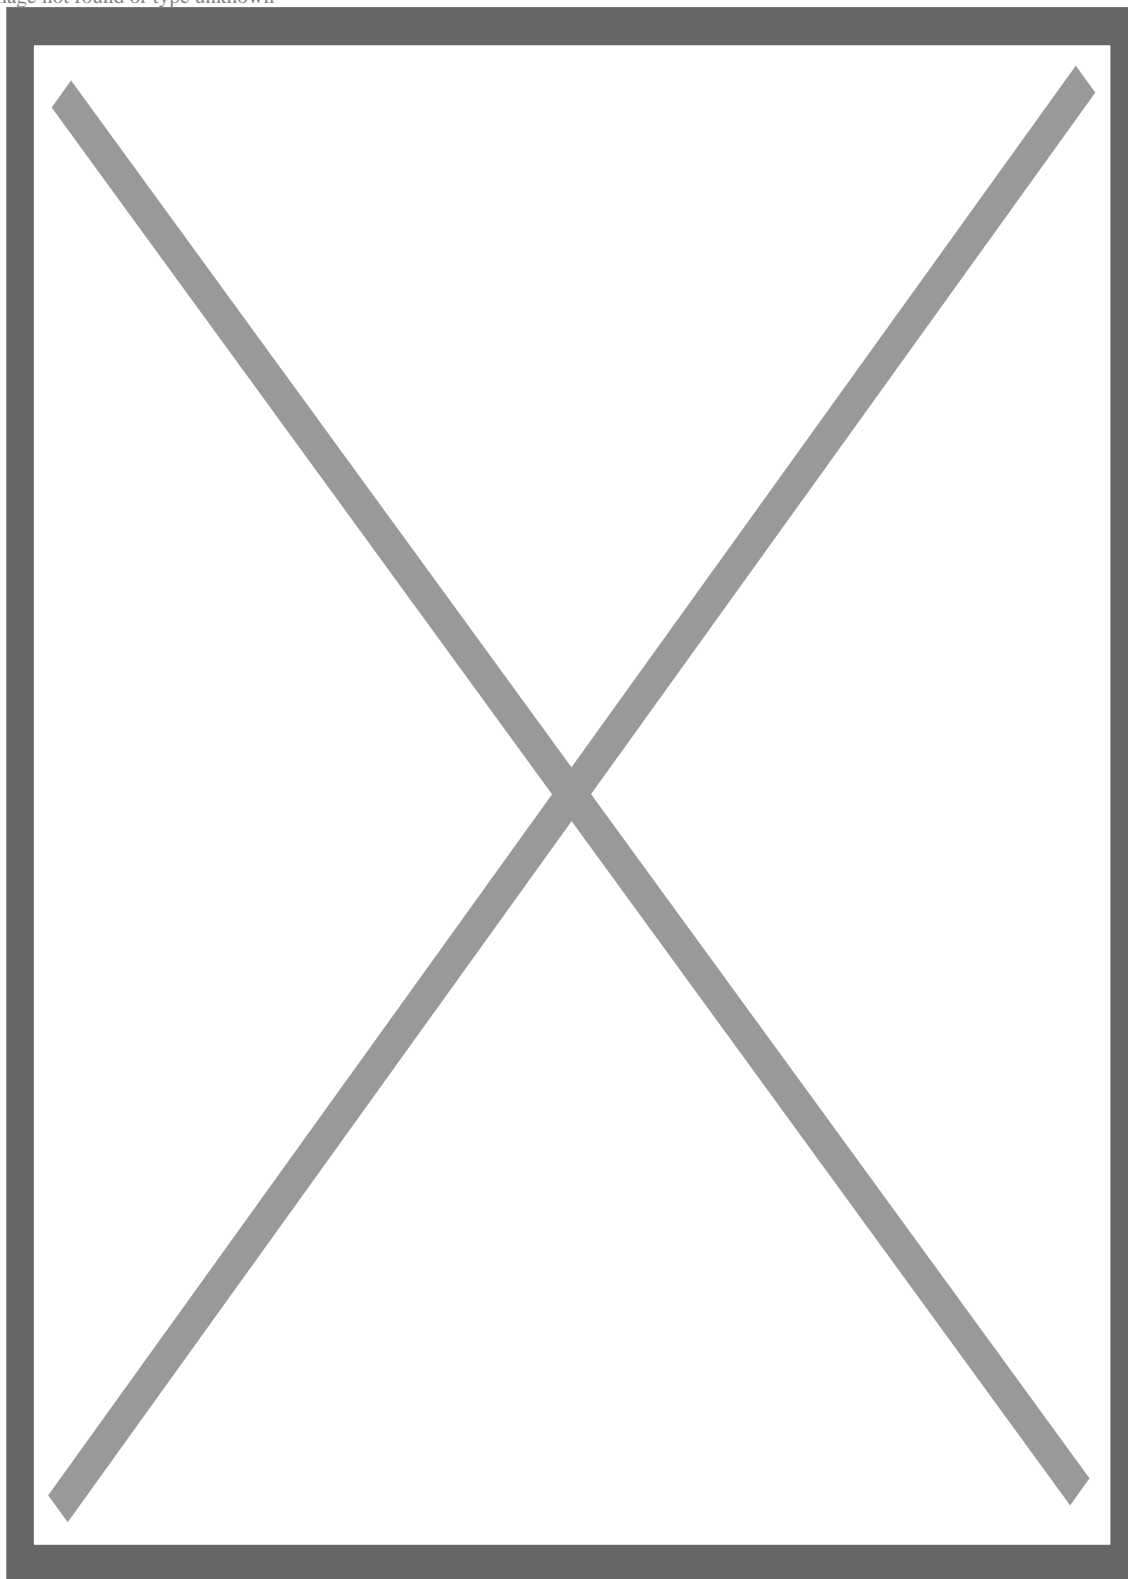

Just two days after the IRS ran a help wanted ad that demanded new hires be willing to kill Americans as part of collecting tax money, illegitimate AG Merrick Garland goes on live TV and lectures the American people, demanding they stop bullying the FBI and the DOJ.

Garland astonishingly claims to be upholding “the rule of law” as his lawless cabal of armed tyrants run roughshod across America, terrorizing anyone connected to Trump or the America First movement.

As this is happening, the IRS is building a massive army of heavily armed executioners whose job description requires they be willing to fire upon — and kill — private American citizens.

A recent job posting on [USAjobs.gov](https://www.usajobs.gov) listed the “Major Duties” of the new IRS employees as including a willingness to use “deadly force” to fire upon American citizens and kill them.

No doubt the “dangerous assignments” described by the IRS include assaulting and murdering American citizens, then confiscating their property.

Notably, **the IRS doesn't need to exist at all since taxes don't even fund the government.** America is so deep in debt that it's mostly funded by money printing, not tax collection. Taxes are not in any way necessary to keep the US government funded. It can simply print the money it needs at any time, essentially without cost.

The real purpose of the IRS is not to collect taxes but to terrorize the American people and prevent people from ever retiring on assets they've saved.

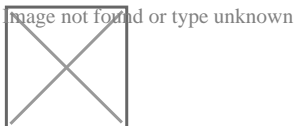

IRS rifle teams and police impersonators

Adding to the disgust of all this, the [IRS Criminal Investigations annual report from 2021](#) brags about **IRS rifle fire teams and IRS "police" shooters** taking aim at rows of targets that represent American taxpayers. These photos are taken from that IRS report, which seemingly celebrates the mass shooting of Americans in cold blood:

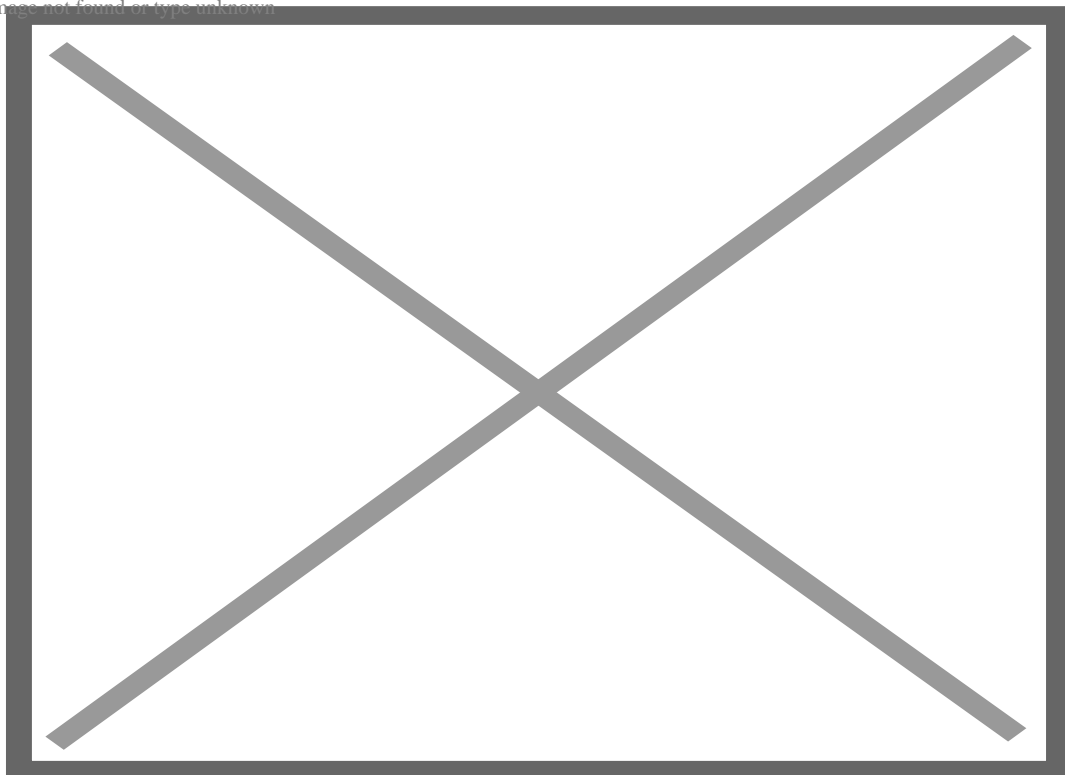

Note that IRS agents being trained to kill Americans are also impersonating police by wearing "POLICE" shirts even though they have zero actual police authority. They are not police. They are a runaway, power hungry, thuggish federal agency that's building its own private paramilitary force to go to war with the American people.

Those paper targets in the following photo, as you might notice, are not simply target circles. **They are images of people.** American people:

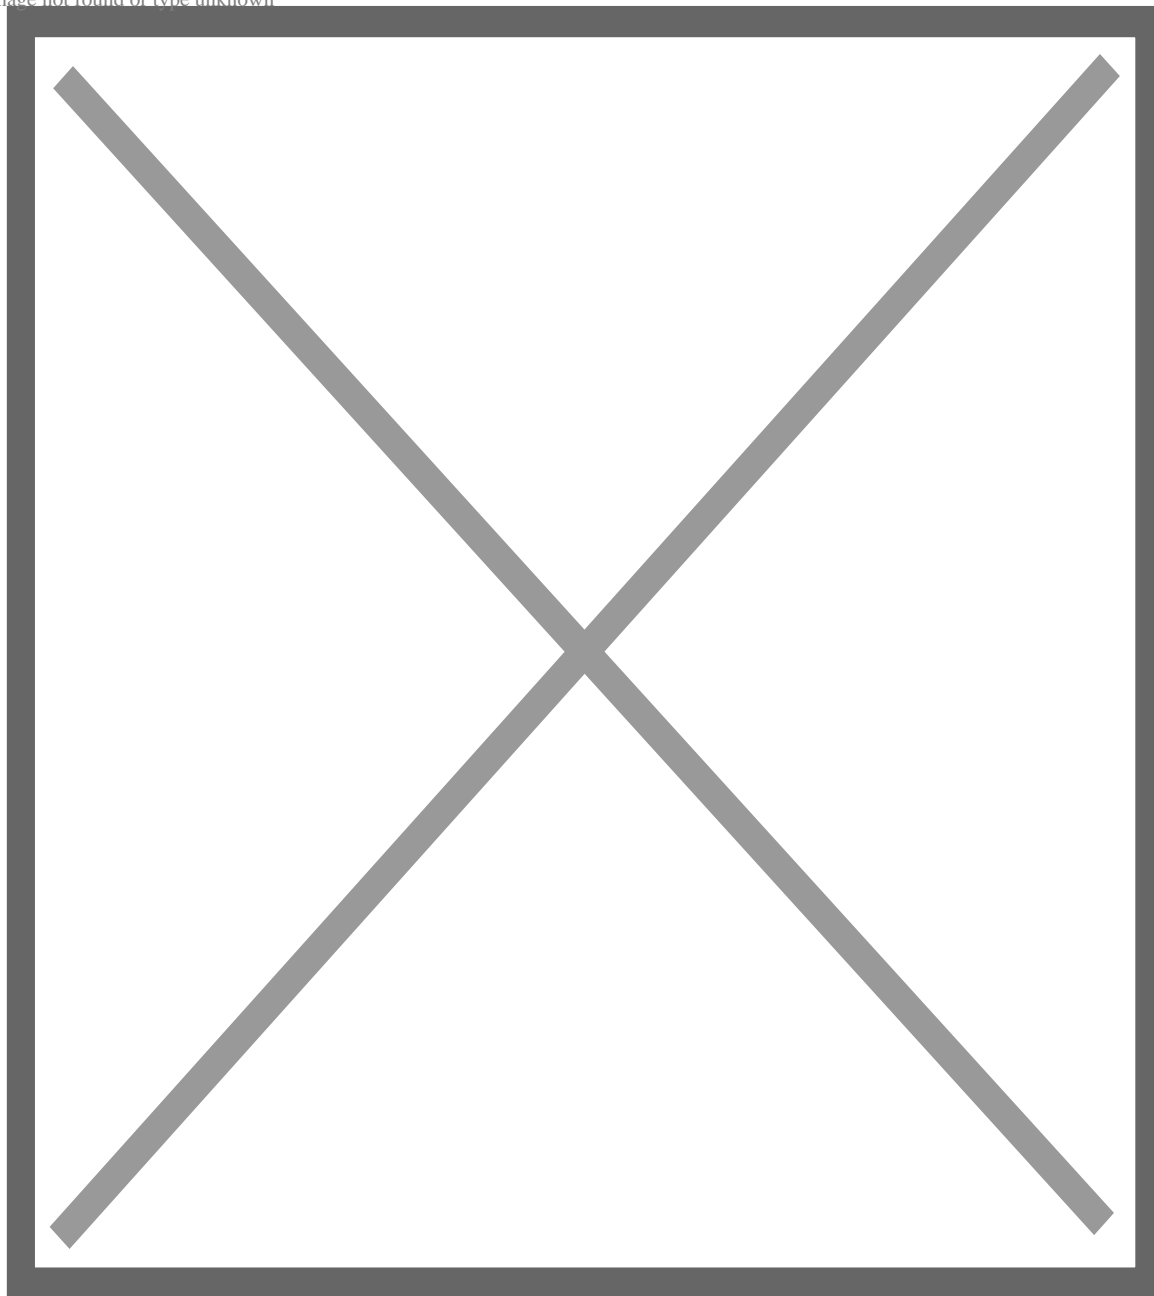

And here's a close-up, zoomed in image of some of the targets:

Note that these targets are shaped like *people*, not merely circular target zones for rifle accuracy:

What these targets prove is that **the IRS is deliberately training to shoot American citizens**, and they are “desensitizing” their troops to be able to pull the trigger when they are shooting people.

So just as AG Garland is lecturing Americans to stop being mean to the FBI, **the IRS is raising a massive, heavily armed military-like army of tax agents who will shoot to kill** on command.

This is wildly unconstitutional and extremely dangerous to our republic, yet Garland and the illegitimate Democrats currently running this regime pretend that *they* are the victims, and that the American people deserve to be assaulted and shot by federal agents.

What’s clear is that **the DOJ, FBI and IRS are waging a hot war against the American people**,

literally training their agents to murder Americans on command.

IRS buys millions of rounds of ammunition and deploys “weapons of war” against the American people

The IRS even purchased over **5 million rounds of ammunition just this year alone**, arming up its paramilitary troops with ammunition for the very same AR-15 rifles that Democrats claim are “weapons of war.” As the NY State Firearms Association explains:

In just the last few months, the Internal Revenue Service has bought almost 5,000,000 rounds of small arms ammunition — spending almost \$700,000 in the process.

The obvious question is why would a bunch of bean counters who spend their days staring at computer screens need to stock up on millions of rounds of ammo?

3,151,500 rounds of pistol ammo.

Over 350,000 rounds of shotgun ammo.

Almost 1.5 million rounds of rifle ammo.

The answer is obvious: **The IRS is raising a massive army to wage war against the American people.** This war has already begun with the DOJ and FBI conducting an illegal raid on President Trump’s private residence while terrorizing other conservatives who represent the *America First* movement.
