

EUROPEAN DOOMSDAY DAYS AWAY! – MASSIVE FALSE FLAG BLACKOUT COMING SOON? – GREAT RESET (VIDEO 27 min)

Description

Josh Sigurdson reports on the so-called “European doomsday” set to happen on July 22nd, 2022 as Russia shuts off natural gas allegedly due to not only absurd attacks on the country by the European Union, but also as insane climate policies are pushed through and the supply chain collapses. It also happens one day after the WHO convenes to decide on whether they’re going to declare an international health emergency. Now that the US and most other countries signed onto a treaty with them, this Monkeypox hoax could prove bad. Not because it’s “dangerous” but because the global government IS dangerous. We are going to be on the ground on the 22nd of July in Germany, one of the worst countries to be in on the day of the natural gas shut off and will do our best to report on what we see.

Meanwhile, they’re purposely shutting down the supply chain and while there are railway strikes, the trains are being stopped and shut down regardless as California also kicks 70,000 trucks off the highways. The Dutch farmers continue to stand up against insane climate policies too. It’s about to get even crazier! Get prepared now!
