

Fauci: “There Are Now Two Americas, The Vaccinated & The Unvaccinated”

Description

USA: America’s favourite Chinese lab funding coronavirus doomonger doctor Anthony Fauci announced Tuesday that there are now two Americas, a vaccinated America and an unvaccinated America.

In an appearance on Dom Lemon’s CNN panic hour, Fauci declared that “When you have such a low level of vaccination super-imposed upon a variant that has a high degree of efficiency of spread, what you are going to see among under-vaccinated regions, states, cities or counties you’re going to see these individual types of blips. It’s almost like it’s going to be two Americas.”

“You’re going to have areas where vaccination rate is high, where more than 70% of the population received at least one dose,” he continued, adding “When you compare that to areas where you may have 35% of the people vaccinated, you clearly have a high risk of seeing these spikes in those selected areas.”

Inevitably, Fauci concluded “The thing that’s so frustrating about this, Don, is that this is entirely avoidable, entirely preventable.”

“If you are vaccinated, you diminish dramatically your risk of getting infected and even more dramatically your risk of getting seriously ill. If you are not vaccinated, you are at considerable risk,” Fauci once again repeated.

Watch:

Fauci is completely ignoring the science on natural immunity again.

As Senator Rand Paul noted earlier this week, there is a boat load of misinformation on the matter coming from a government that is indiscriminately pushing vaccinations:
