

Fauci's Daughter Ali Fauci Is A Software Engineer For Twitter

Description

Last Updated on May 16, 2020

NIAID director Dr. Anthony Fauci, facing harsh criticism for his response to the Coronavirus outbreak, has a daughter named Alison ("Ali") who is a software engineer for Twitter. This comes as Silicon Valley increasingly cracks down on so-called misinformation about the virus from truth-minded individuals who do not automatically accept what the experts like Fauci have to say.

Fauci's daughter's software engineer job at Twitter was confirmed in articles by [Heavy](#) and [Deseret](#).

Twitter has some explaining to do to convince independent-minded people that there is no conflict of interest when it comes to censoring information critical of Ali's father Dr. Fauci. Family relationships are everywhere in the elite world, as evidenced by Chelsea Clinton's membership on the Board of Trustees of Partners in Health, which is doing Coronavirus Contact Tracing in Massachusetts.

Meanwhile...

President Donald Trump is fighting to find a medical solution for Coronavirus in the short term, expressing hope that the anti-malaria drug Chloroquine/hydroxychloroquine can help patients suffering from the Chinese virus.

The truth is that President Donald Trump is locked in an intense power struggle with Bill Gates, who is pushing his vaccines, which may not be available to the public until after November's election.

Gates has a lot of pull in the medical world, he has a multi-million dollar relationship with Dr. Fauci, and Fauci originally took the Gates line supporting vaccines and casting doubt on Chloroquine. Coronavirus response team member Dr. Deborah Birx, appointed by former president Obama to serve as United States Global AIDS Coordinator, also sits on the board of a group that has received billions from Gates' foundation, and Birx reportedly used a disputed Bill Gates-funded model for the White Houses' Coronavirus effort.

Gates is a big proponent for a population lockdown scenario for the Coronavirus outbreak.

National Institute of Allergy and Infectious Disease (NIAID, a division of National Institutes of Health, NIH) director Dr. Anthony Fauci, who is represented by the Autumn Speakers Bureau, initially criticized Trump's hopeful assessment of Chloroquine, saying in an interview with CNN's Anderson Cooper that "There's no magic drug for coronavirus right now," and lectured, "Let me put it into perspective for the viewers .. there has been anecdotal non-proven data that it [chloroquine] works... but when you have an uncontrolled trial you can never definitely say that it works."

Fauci then changed his tune and launched a public relations campaign huddling closer to Trump. Fauci said that he would definitely prescribe Chloroquine for patients. "Yeah, of course, particularly if people have no other option. These drugs are approved drugs for other reasons. They're anti-malaria drugs, and they're drugs against certain autoimmune diseases like lupus. Physicians throughout the country can prescribe that in an off-label way. Which means they can write it for something it was not approved for."

But Fauci makes his hostility toward the Trump-touted drugs clear:

First of all this is a brilliant idea [@kilmeade](#) to study how many people that've taken hydroxychloroquine long term have contracted [#COVID](#) maybe even have them take antibody test. Second of all Fauci doesn't want it prescribed here but it's fine if Spain does? pic.twitter.com/hcnRhos13g

— Rosie memos (@almostjingo) [April 3, 2020](#)

Fauci is pushing the talking point that things will never go back to normal in our society until we have the ability to mass-vaccinate people, [echoing Bill Gates' assertion](#) that mass gatherings in our culture "may not come back at all" before mass-vaccinations.

[#NEW](#): Dr. Anthony Fauci on return to normalcy from pandemic:

"If 'back to normal' means acting like there never was a Coronavirus problem, I don't think that's going to happen until we do have a situation where you can completely protect the population." pic.twitter.com/JbE7uasbO2

— Jennifer Franco (@jennfranconews) [April 6, 2020](#)

Fauci downplayed the threat of Coronavirus on January 21 in a Newsmax TV interview, saying, "This is not a major threat for the people in the United States, and this is not something that the citizens of the

United States right now should be worried about.” Since then, Coronavirus has exploded in the United States, boosting demand for a vaccine.

This is Fauci 10 days before Trump’s Travel Ban. pic.twitter.com/PU3AuDKctv

— Justin Pulitzer Trades (@JustinPulitzer) [April 7, 2020](#)

Fauci later said that people would not have to change their daily activities as a result of the Coronavirus outbreak:

It is time to [#firefauci](#) Mr. President. The People Demand It <https://t.co/J4SSXn1kPB>

— Patrick Howley (@HowleyReporter) [April 12, 2020](#)

But Fauci’s NIAID actually funded a study on Bat Coronavirus, which was a project that included scientists at the Wuhan Institute of Virology, the Chinese lab at the center of controversy over their bat research. That study confirmed in 2018 that humans have died from coronavirus.

Here’s an excerpt from the April 4, 2018 NIAID website entry entitled “[New Coronavirus Emerges From Bats in China, Devastates Young Swine](#)”: “A newly identified coronavirus that killed nearly 25,000 piglets in 2016-17 in China emerged from horseshoe bats near the origin of the severe acute respiratory syndrome coronavirus (SARS-CoV), which emerged in 2002 in the same bat species. The new virus is named swine acute diarrhea syndrome coronavirus (SADS-CoV). It does not appear to infect people, unlike SARS-CoV which infected more than 8,000 people and killed 774. No SARS-CoV cases have been identified since 2004. The study investigators identified SADS-CoV on four pig farms in China’s Guangdong Province. The work was a collaboration among scientists from EcoHealth Alliance, Duke-NUS Medical School, Wuhan Institute of Virology and other organizations, and was funded by the National Institute of Allergy and Infectious Diseases, part of the National Institutes of Health. The research is published in the journal *Nature*. The researchers say the finding is an important reminder that identifying new viruses in animals and quickly determining their potential to infect people is a key way to reduce global health threats.”

Additionally, the *Daily Mail* reported that National Institutes of Health, of which Fauci’s NIAID is a member, provided a \$3.7 million grant to the Wuhan Institute of Virology to study bat-borne coronavirus. That study was headlined, ‘Discovery of a rich gene pool of bat SARS-related coronaviruses provides new insights into the origin of SARS coronavirus.’

So what is really going on here?

The true behind-the-scenes story is coming to light:

Bill Gates Cast Doubt on Chloroquine And Said He Is Running A Study On It

“There are a lot of therapeutic drugs being examined. This is one of many but it is not proven. If it works we will need to make sure the finite supplies are held for the patients who need it most. We have a study going on to figure this out. We also have a screening effort to look at all the ideas for

Therapeutics because the number being proposed is very large and only the most promising should be tried in patients. China was testing some things but now they have so few cases that that testing needs to move to other locations,” Gates said.

Gates Is Funding Coronavirus Vaccine Candidates That Would Compete With Chloroquine, And Dr. Fauci’s Agency Is Co-Partnering On The Project

The company Moderna is working on a Coronavirus vaccine, which they expect will go into clinical trials in April. Dr. Fauci has heaped praise on Moderna and said that a vaccine is the only way to definitively assure the end of the virus. Gates is working on multiple Coronavirus vaccine projects.

The *New Eastern Outlook* journal reported:

“Gates Foundation money is backing vaccine development on every front. Inovio Pharmaceuticals of Pennsylvania received \$9 million from the Gates-backed CEPI, Coalition for Epidemic Preparedness Innovations, to develop a vaccine, INO-4800, which is about to test on humans in April, a suspiciously rapid time frame. In addition Gates Foundation just gave the company an added \$5 million to develop a proprietary smart device for intradermal delivery of the new vaccine.

In addition Gates Foundation monies via CEPI are financing development of a radical new vaccine method known as messengerRNA or mRNA.

They are co-funding the Cambridge, Massachusetts biotech company, Moderna Inc., to develop a vaccine against the Wuhan novel coronavirus, now called SARS-CoV-2. Moderna’s other partner is the US National Institute of Allergy and Infectious Diseases (NIAID), a part of the National Institutes of Health (NIH). Head of NIAID is Dr Anthony Fauci, the person at the center of the Trump Administration virus emergency response. Notable about the Fauci-Gates Moderna coronavirus vaccine, mRNA-1273, is that it has been rolled out in a matter of weeks, not years, and on February 24 went directly to Fauci’s NIH for tests on human guinea pigs, not on mice as normal. Moderna’s chief medical adviser, Tal Zaks, argued, “I don’t think proving this in an animal model is on the critical path to getting this to a clinical trial...

Add to this the fact that the Gates Foundation and related entities such as CEPI constitute the largest funders of the public-private entity known as WHO, and that its current director, Tedros Adhanom, the first WHO director in history not a medical doctor, worked for years on HIV with the Gates Foundation when Tedros was a government minister in Ethiopia, and we see that there is practically no area of the current coronavirus pandemic where the footprints of the omnipresent Gates are not to be found. If that is to the good of mankind or grounds to be worried, time will tell.”

New Eastern Outlook journal passage ends

The Hill reported:

“Going into a Phase One trial within three months of getting the sequence is unquestionably the world indoor record. Nothing has ever gone that fast,” according to Fauci.

While it is uncertain that Moderna’s answer is the solution, Fauci notes that the only surefire way to stop an outbreak is to develop a vaccine. Moderna manufactures drugs around messenger RNA

molecules that carry instructions to reprogram cells in the body to operate differently and beneficially. Currently, its genetic technology has not created a vaccine for humans.

The first study of the vaccine will take place at NIAID. If it is successful, a second trial would feature closer to hundreds of people. Pending the results of future studies and regulations, the vaccine may not be readily available until next year, [Fauci said](#).

Hill passage ends

Genetic Engineering & Biotechnology News reported in 2016 on Gates' relationship with Moderna:

"Moderna Therapeutics said today it received an initial \$20 million grant from the Bill & Melinda Gates Foundation to develop a new affordable combination of messenger RNA-based antibody therapeutics geared toward preventing HIV infection.

The grant is intended for use in the antibody combination's preclinical study and a Phase I clinical trial. Gates Foundation's \$20 million funding could potentially grow into a total \$100 million commitment—including the HIV antibody project—toward development of additional mRNA-based treatments for various infectious diseases, Moderna said.

"The foundation's mission to help all people lead healthy and productive lives is well aligned with Moderna's mission to deliver on the promise of transformative mRNA science to bring new medicines to patients," Moderna CEO Stéphane Bancel said in a statement.

Moderna said the development effort would be led by its infectious disease-focused venture company, Valera..."

Fauci Is Tight with Bill Gates

"He's very good about not overpromising," Gates said of Fauci in 2018 as Gates worked on a universal flu vaccine. NIAID Council minutes from 2019 show Fauci's agency identifying a Gates Foundation workshop as being of interest. Gates met with Fauci in 2017 "to discuss research opportunities in global health." In 2010, Fauci was named to the Leadership Council of the "Decade of Vaccines" Collaboration, which the World Health Organization, Fauci's agency NIAID, UNICEF, and the Bill and Melinda Gates Foundation convened.

Fauci delivered a keynote opening address on "The Challenge of Pandemic Preparedness" in Washington, D.C. at the October 2, 2017 Grand Challenges meeting, which is a project of the Bill and Melinda Gates Foundation.

Fauci hung out with Gates in 2018 at an NIH workshop:

In October 2019, Fauci Announced A Partnership Between the Gates Foundation and Fauci's Agency, In Which The Gates Foundation Pledged To Spend \$100 Million

[The American Journal of Managed Care reported on October 28, 2019:](#)

"The National Institutes of Health (NIH) has announced plans to invest at least \$100 million over the next 4 years to develop gene-based therapies for 2 diseases: HIV and sickle cell disease (SCD). The Bill and Melinda Gates Foundation (Gates Foundation) will also contribute \$100 million to the goal of advancing these potential cures, with an aim toward providing affordable, globally available treatment that will be accessible to patients in low-resource settings.

According to the NIH, the collaboration between the organizations will focus on 2 key areas. First, it will identify potential candidate cures for preclinical and clinical evaluation, and second, it will define long-term opportunities to partner with organizations in Africa...

"This collaboration is an ambitious step forward, harnessing the most cutting-edge scientific tools and NIH's sizable global HIV research infrastructure to one day deliver a cure and end the global HIV pandemic," said NIAID director **Anthony S. Fauci**, MD, in a statement announcing the initiative. "We are taking into account those with the greatest need at the foundation of this effort, to ensure that, if realized, this exceptional public health achievement will be made accessible to all."

Dr. Fauci Is Speaking At The World Vaccine Congress in September Alongside A Coterie of Public Sector and Private Sector Folks From WHO, CDC, FDA, Merck, Pfizer, etc.

Fauci is a Hillary Clinton Admirer

Dr. Deborah Birx is garnering criticism for touting a disputed model for the Coronavirus outbreak prepared by the University of Washington's IHME, a project of the Bill and Melinda Gates Foundation. Birx's license to practice medicine in the state of Pennsylvania expired in 2014.

Deborah Birx Sits on the Board of The Global Fund, which is heavily funded by Bill Gates' organizational network, as journalist Jordan Schactel discovered. The Bill and Melinda Gates Foundation gave the Global Fund a \$750 million promissory note in 2012.

The Global Fund explains, "The Bill & Melinda Gates Foundation is a key partner of the Global Fund, providing cash contributions, actively participating on its board and committees, and supporting the Global Fund's advocacy, communications and fundraising efforts. The Gates Foundation has contributed US\$2.24 billion to the Global Fund to date, and pledged US\$760 million for the Global Fund's Sixth Replenishment, covering 2020-2022."

Fauci Holds Numerous Patents That Present More Potential Conflicts of Interest For Him In The Medical Field, As Many of these Patents Directly Pertain To HIV Treatment

[Here Is A List of Patents Held Or Pending Patent Applications Filed By Anthony S. Fauci](#)

Fauci was previously accused of a conflict of interest regarding one of his patents in 1999.
