

Federal Judge Confessed Trump Could Be A Sitting President in 2024!

Description

USA: This is the truth!

Trump may be the sitting president of the US again. Bear in mind that this isn't a wish, it's something that the enemies consider, but they don't want to say that out loud.

One federal judge recognized this possibility. She is Judge Karen Henderson, and she stated: "We have a situation that involves a sitting President and a former President. If this drags out, for all we know, he could be a sitting president again," Judge Henderson said.

A federal appellate judge considering whether Donald Trump should be forced to turn over his tax returns to Congress suggested on Thursday that he could become president again — and that could be a factor in the case.

"We have a situation that involves a sitting President and a former President. If this drags out, for all we know he could be a sitting president again," Judge Karen Henderson, of the US Court of Appeals for the DC Circuit, noted on Thursday.

Henderson weighed in during a hearing where three judges on the appeals court are looking at whether a lower court judge correctly threw out Trump's attempt to block the House Ways and Means Committee from getting his and his business' IRS records.

Dems will spend another four years trying to downgrade Trump.

They are scared of him, and they don't want him to run and win in 2024.

How can it be possible, that anyone in their right mind could follow this dishonorable, lying, divisive egomaniac, Donald Trump? If Trump was ever elected again, President of the

United States, he would obliterate democracy and devastate & destroy this country.

Donald Trump has been a criminal his whole life. And he's always gotten away with it. And his voters & followers don't care. I talk to them every day.

NY prosecutor resigned because Donald Trump had committed numerous crimes and he was not allowed to indict him. When is someone going to step up and hold this sorry excuse for a human being accountable?
