

## Fine Print Reveals Biden's \$33B Ukraine Package Is Giant Bribery and Kickback Scheme

### Description

**USA: While you may have been shocked by the size of Biden's announced \$33 billion Ukraine relief fund, chances are you didn't read the fine print. If you did, you would be outraged by what is clearly a brazen Democrat bribery and kickback scheme disguised as foreign aid.**

Biden's spending request outlines a massive amount of money for various ideological foreign policy initiatives under the guise of Ukraine relief (spoiler: it isn't). Make no mistake: the proposal outlines a kickback and bribery scheme.

Some of the spending includes an allocation of funds to the State Dept including funds to USAID to “*provide \$8.8 billion to the Department of State for economic support and assistance to the people of Ukraine **and other affected countries**, including direct budgetary support, as well as support for food security, democracy, anticorruption, cybersecurity, **counter-disinformation**, human rights, atrocity documentation, energy, and emergency infrastructure needs.*” {[pdf page 41](#)} The request specifically authorizes the transfer of these funds globally, outside of Ukraine.

This request would provide \$8.8 billion to the Department of State and assistance to the people of Ukraine and other affected countries support, as well as support for food security, democracy, anticorruption, disinformation, human rights, atrocity documentation, energy, and other needs. Funds would also be used by the Department of State and the International Development for diplomatic and development support at the Embassy Kyiv. In addition, this request would authorize the transfer of Assistance for Europe, Eurasia and Central Asia account and several other accounts to carry out these purposes.

[{READ SOURCE DOCUMENT}](#)

Apparently, the State Dept is going to set up an international version of DHS “*disinformation governance board*.” But wait, it gets worse... CTH [report](#):

U.S. taxpayers are also going to subsidize farming in Europe and fund the climate change initiatives by paying for the development of alternate energy sources. “*This would include [\$500 million] support for small- and medium- sized agrobusinesses during the fall harvest and for natural gas purchases by the Ukrainian state energy company.*” [{page 44}](#)

Mechanisms to legalize defense contractor kick-backs: “*This request would authorize Ukraine to utilize Foreign Military Financing Program funds appropriated in this Act and prior Acts to the Department of State to contract directly with U.S. companies to procure defense related materials which would facilitate the delivery of military assistance and security sector support.*” [{page 48}](#)

Mechanisms to spread the money all over government institutions without prior approval: ...” “*This request would provide the authority to reprogram funds appropriated in this Act and prior Acts making appropriations for the Department of State, foreign operations, and related programs for assistance to Ukraine without regard to any minimum amounts specifically designated in such Acts. This authority would provide the needed flexibility to match resources with evolving needs and decrease reliance on new appropriations.*” [{Page 50}](#)

The last segment is a massive change in the U.S. government power to seize Russian private property and assets, sell them to whoever Biden chooses, and then give the proceeds of the sales to U.S. politicians, friends, family members, or perhaps Ukraine President Volodymyr Zelenskyy.

## KLEPTOCRACY ASSET RECOVERY PACKAGE: 6 LEGISLATIVE PROPOSALS

Descriptions and section-by-section analyses by proposal

The following is a package of six legislative proposals to strengthen the United States' ability to hold Russia accountable financially for its ongoing aggression against Ukraine.

1. *Establishing Streamlined Administrative Authority to Seize Russian Assets*
2. *Enabling Transfer to Ukraine the Proceeds from Forfeiture of Russian Assets*
3. *Clamping Down on Facilitation of Sanctions Evasion*
4. *Leveraging Foreign Partners' Ability to Freeze and Seize Russian Assets*
5. *Modernizing Racketeering to Include Sanctions Evasion*
6. *Expanding the Time Limit to "Follow the [Oligarchic] Trail"*

These proposals would strengthen our whole-of-government approach to holding Russia accountable for its aggression against Ukraine, and ensure that the assets of our international partners—in investigating, prosecuting, and holding accountable oligarchs to be used for the benefit of Ukraine.

\*\*\*

It is an international version of current DOJ civil asset forfeiture. The United States government (DOJ, Dept of Treasury and Dept of State) takes ownership of any targeted Russian asset, sells the asset (to whoever they choose, including personal family members) then take the proceeds and distributes them to whoever they choose in the U.S. or Ukraine government.

**Example:** Confiscate a \$200 million oligarch yacht, sell it to Hunter Biden (or Black Rock / Vanguard) for \$50,000, give the \$50k to Zelenskyy and then have Black Rock / Vanguard deposit \$10 million in James Biden or DNC bank account. {[Page 52](#)}

No, I'm not joking. Sit down and read how they are legalizing this process.
