

## FRIGHTENING CLIP: We're The Last Generations Of Homo Sapiens! [VIDEO]

### Description

#### The most frightening clip!

The World Economic Forum created by Klaus Schwab makes headlines as Prime Minister Justin Trudeau has invoked the "Emergences Act" against the freedom convoy. Trudeau and the media attempt to portray the protesters as violent and aggressive, but the videos emerging show quite the opposite.

Trudeau moves to seize the bank accounts of the protesters. In 2018, before the C-19 mandates, vaccine passports, and government overreach, Yuval Noah Harari talked about the power behind human data and how humanity was contained to its human form may represent a thing in the past.

He pointed out: "imagine the situation in 10-20 years when an algorithm can tell any teenager exactly where he or she is on the gay-straight [spectrum](#)."

Adding: "once we have algorithms that can understand me better than I understand myself, they could predict my desires manipulate my emotions & even take decisions on my behalf. & if we are not careful, the outcome might be the rise of digital dictatorships."

We have a small clip of his speech. Harrari warned about the future, confessing the "control of data might enable human elites to do something even more radical than just build digital dictatorships. By hacking organisms, elite's may gain the power to re-engineer the future of life itself."
