

Fully-Vaxxed Gibraltar Sees 2500 PERCENT SPIKE in COVID-19 Cases Per Day, Initiates New Lockdowns

Description

The nation of Gibraltar, which achieved a 99 percent vaccine compliance rate as of June 1, is now seeing an astounding spike in cases.

The number of COVID cases per day have increased by an astounding 2500 percent since June 1, in the latest bit of evidence that the vaccine regime is not all it's cracked up to be.

?? By June 1st, over 99% of Gibraltar's population was fully vaccinated. Since that time, new COVID cases per day have increased more than 2500%. ??

As a result of the failure of the COVID-19 vaccine, Gibraltar is undergoing another lockdown of sorts, which is affecting public life for all of the countrymen who bought the Big Pharma propaganda and lined up for the shots.

The Gibraltar Ministry of Culture and the Office of Civil Contingencies has cancelled all large scale events until at least September due to the outbreak. They are also urging all private facilities to implement restrictions as well.

“The Government calls on private bars, restaurants and nightclubs to be cautious in the events that they hold, to strictly control numbers and to ensure that clients are vaccinated and have a negative COVID-19 test result,” the government [wrote in their announcement](#) of the restrictions.

“At this point in time the Government is not considering introducing legislation to control catering establishments and nightclubs, but this is of course a possibility should cases continue to rise

regardless,” they continued.

“While all of this is inconvenient and burdensome, it is important that we continue to work together, as we have done up to now, in reducing the risk of transmission and once again obliterating COVID-19 in the community,” the government added.

Throughout the West, government have begun to re-impose the mask mandates due to the lack of efficacy of the vaccines, which is then blamed on the individuals who refused the shots by the mass media and the so-called public health experts.

Big League Politics has reported about the disgusting but predictable effects of the scamdemic:

“As the experimental COVID-19 vaccine is revealed as far from full proof in stopping the spread of the virus, public health “experts” are saying that it is once again time to return to forced masking.

The Washington Post published a profile on the bureaucrats that are once again pushing to get masks back on the peasants.

“Universal masking indoors is a way of taking care of each other while we get more people vaccinated,” said Barbara Ferrer, who works as director of the Los Angeles County Department of Public Health, which moved a week ago to reimplement their indoor mask mandate.

“It really doesn’t disrupt any business practices. It allows us to remain fully open – while we acknowledge that the delta variant [is] spreading like wildfire here,” she added.

“We need to prepare the public for what could be, again, a return to some of these mitigation measures,” former Trump-appointed surgeon general Jerome Adams said during an appearance on the Indianapolis TV station WISH-TV on Sunday. He added that the Centers for Disease Control and Prevention (CDC) should “hit the reset button” and demand mask mandates.

“The best protection everybody has is masks,” said Kimberly Prather, an academic with the University of California, San Diego, who wholeheartedly supports a new indoor mask mandate.

“While delta numbers are going up – and if I’m in a crowded outdoor location with lots of people yelling – I would be wearing a mask,” she added.”

Gibraltar is another example that the COVID-19 experimental vaccine regime is faltering, but the globalists will never admit their mistakes. The fear propaganda will continue without regards for the truth.
