G20 globalists push mandatory vaccine passports for all international travel despite fading COVID plandemic

Description

By now, sane, reasonable people know that while the COVID-19 pandemic wasn't a "hoax" — the virus was real, and likely, our own government helped fund its creation — it was certainly coopted and used by Western global elites as a means of controlling their respective populations for nearly two years.

Since then, the pandemic has become a *plandemic* — that is, it is now serving as justification for permanently altering behaviors around the globe while usurping the freedoms of billions of people.

Case in point: At the recent G20 gathering in Bali, Indonesia, the assembled elite proposed a universal vaccine passport plan to 'allow' freedom of travel. In short, anyone wanting to step on a plane or board a ship to travel internationally would have to agree to have their medical privacy invaded by government bureaucrats, even though the COVID virus has all but vanished and is no longer close to the threat that it was (and even then it wasn't nearly as deadly and serious as we were being told).

Indonesian Health Minister Budi Gunadi Sadikin, who spoke about the plan on behalf of the G20 host country earlier in the summit had called for a "digital health certificate" using WHO standards.

"Let's have a digital health certificate acknowledged by WHO… if you have been vaccinated or tested properly, then you can move around," he said during a discussion.

G20 to adopt Vaccine Passports using WHO standards

"Let's have a digital health certificate acknowledged by WHO… if you have been vaccinated or tested properly, then you can move around", said the Indonesian health minister in Bali…

No thanks …

Of course, the *elites* won't have to be subjected to the requirement; they'll still have their freedom of movement *and* privacy because, after all, *they're 'elite.'*

And just so readers don't think this idea is the brainchild of a single government bureaucrat, the U.S. Embassy in Italy published the entire "G20 Bali Leaders' Declaration," which contained several references to "digital" vaccine documentation for travel:

*We recognize that **the extensive COVID-19 immunization is a global public good and we will advance our effort to ensure timely, equitable and universal access to safe, affordable, quality and effective vaccines, therapeutics and diagnostics (VTDs)**. Acknowledging the adoption of the Ministerial Declaration on the WTO Response to the COVID-19 Pandemic and Preparedness for Future Pandemics and the Ministerial Decision on the TRIPS Agreement at the WTO's 12th Ministerial Conference (MC12), we note that, no later than six months from the date of the Ministerial Decision on the TRIPS Agreement, WTO members will decide on its extension to cover the production and supply of COVID-19 diagnostics and therapeutics. We remain committed to embedding a multisectoral One Health approach and enhancing global surveillance, including genomic surveillance, in order to detect pathogens and antimicrobial resistance (AMR) that may threaten human health. **To enable global pathogen surveillance** as part of our commitment to implement the IHR (2005), we encourage sharing of pathogen data in a timely manner on shared and trusted platforms in collaboration with WHO.*

Also:

*We support the WHO mRNA Vaccine Technology Transfer hub as well as all as the spokes in all regions of the world **with the objective of sharing technology and technical know-how on voluntary and mutually agreed terms**. We welcome joint research and joint production of vaccines, **including enhanced cooperation among developing countries**.*

*We acknowledge the importance of shared technical standards and verification methods, under the framework of the IHR (2005), **to facilitate seamless international travel, interoperability, and recognizing digital solutions and non-digital solutions, including proof of vaccinations**
. We support continued international dialogue and collaboration on the establishment of trusted **global digital health networks** as part of the efforts to strengthen prevention and response to future pandemics, that should capitalize and build on the success of the existing standards and **digital COVID-19 certificates**.*

*The COVID-19 pandemic **has accelerated the transformation of the digital ecosystem and digital economy. We recognize the importance of digital transformation in reaching the SDGs**.*

Anything "digital" can be hacked and/or controlled by governments, which means anyone who does not want to participate or who runs afoul of the 'global rules' will have their digital presence eliminated, with no ability to earn a living or subsist, let alone travel.
