

Germany has strengthened controls on its border with Poland

Description

GERMANX/POLAND: Footage from the German-Polish border has surfaced online.

Amid fears of illegal border crossings to Germany and escalating tensions on the Polish-Belarusian border, Germany has increased police presence on the border.

Berlin and Warsaw issued accusations against Minsk of trying to use the migration crisis as a tool for political pressure on the European Union.

Germany promised to support Poland, which faced pressure from Belarus. On November 12, it became known about the appearance of German military formations in the Polish territory. They are 60 km from the Belarusian border. It is known that German military equipment was seen near the town of Olsztyn. According to some reports, Berlin moved its troops to strengthen the Polish military.
