

GREAT US! Musk's Firm under Investigation for Animal Testing. None for Manmade SARS-Cov-2 or Dangerous mRNA Vaccines on Humans

Description

To develop vaccines or biological weapons, primates in the BSL-4 laboratories of Fort Detrick managed by Pentagon contractor Bethesda can be infected with all kinds of lethal laboratory-enhanced coronaviruses, because Anthony Fauci decided so.

Fig. 1 CT 3D volume-rendered images of lungs of nonhuman primates acquired prior to intratracheal inoculation (baseline) with Middle Eastern respiratory syndrome coronavirus and on days 1, 3, 9, and 13 postinoculation. Images were segmented to highlight pulmonary vasculature (red) and areas of increased consolidation (yellow).

The USAID government agency with the advice of the military agencies DTRA, DARPA and the CIA counterintelligence can finance, together with NHS, NIAID and the Bill & Melinda Gates Foundation, any kind of dangerous biological experiment with the enhancement of coronaviruses through the Gain of Function (GOF) to create various genotypes of artificial SARS-Cov-2.

Humans can also be given anti-Covid boosters, more dangerous than monovalent, and tested only on mice by the American Big Pharma pfizer and Moderna.

The military agency DARPA can launch human neurocerebral control projects and the president of

the World Economic Forum Klaus Schwab can argue that microchipping children is an acceptable solution to health and social control.

While if Elon Musk experiments on primates by inserting microchips for neurocerebral control, he ends up under federal investigation.

This is the US, guys!
