## Doctors in other countries are successfully treating patients with CIO2; American doctors are prohibited from prescribing it

Last summer, Dr. Manuel Aparicio explained to *The New American* magazines’ Alex Newman that he has personally seen great success using CIO2 with his covid patients.

An orthopedic surgeon, Dr. Aparicio says he is legally allowed to administer CIO2 to his patients because he practices in Mexico, which has far more freedom and liberty than the United States when it comes to medicine.

CIO2 is also [used in Bolivia](#) as a covid treatment because, again, there is more freedom there to treat patients with things that are strictly prohibited here in the U.S. (unless they are sold as a dietary supplement, which is how Americans can access or make CIO2).

A study published last year in the journal *Annals of Pharmacology and Pharmaceutics* revealed in more detail how CIO2, also known as “miracle mineral solution” (MMS), blocks SARS-CoV-2 spike proteins from binding to receptors such as Angiotensin-Converting Enzyme 2 (ACE2).

“Chlorine Dioxide (CIO2) is a powerful disinfectant that is known to inactivate both viruses and bacteria,” that study’s abstract explained.

Since the beginning of the *plandemic*, the corporate-controlled media has [attacked CIO2](#) as “snake oil,” even though it helped many to stay healthy and alive rather than die from the Fauci Flu.

The author of TUA University’s Beginner Training Guidebook has provided an incredible gift to the public that you, your family and your friends can use to learn more about this amazing natural remedy.

Take some time to go through the document and see what you think. It is loaded with invaluable information that you will have a hard time finding anywhere else, and the best part is that it is completely *free*.
