

Hundreds Of Congress Members Treated With IVERMECTIN?!

Description

USA: The political elite truly is something special!

They don't wear masks, they're allowed to make overseas trips in the strict middle of C-19 quarantines, and they even get different medical treatment for the deadly disease!

The horse medicine they are banning doctors to use on patients. IVERMECTIN!

In the video below, you have more than enough information and evidence to make your own decision on the matter, purely based on facts, aside from media and Government propaganda and guidelines.

Watch:

Despite all the odds of the Government, the cheap (and already FDA approved) drug has proven extremely effective in other countries like India and Japan.

Unlike [@DrKyle](#), Pierre Kory has class and won't doxx members of Congress who have used alternative treatments for covid, including one controversial medication the FDA calls "horse paste." <https://t.co/WOZUnMacHE>

— Comrade Common-Sense™ (@ComradeVero) [October 8, 2021](#)

To all the comments asking for sources/names for the below:

- 1) This came from a highly credible source inside Congress who has asked to remain anonymous
- 2) I would never divulge the medical treatments of individual members, nor do I know them myself

I fully stand by this tweet. <https://t.co/Vt6UJ2K7sT>

BREAKING SCANDAL

FACT:

Between 100-200 members of Congress and their families & staffers have been treated with IVM & our I-MASK+ protocol for COVID. NO hospitalizations.

Not one of them reported that to the people.

Saved themselves & stayed silent as IVM was torched. <https://t.co/qDAgFGjVq1>

— FLCCC—Front Line COVID-19 Critical Care Alliance (@Covid19Critical) [October 8, 2021](#)

What's your opinion on the matter?

Indeed, they truly are animals, and one of the most low-intelligent races of all.
