

Idaho doctor reports “20 times increase” in cancer among those “vaccinated” for covid

Description

Dr. Ryan Cole, a board-certified pathologist and diagnostics lab owner and operator based out of Idaho, has released [shocking new information](#) about how Wuhan coronavirus (Covid-19) “vaccines” are causing a massive “uptick” in autoimmune diseases and cancer.

In a video produced by the Idaho state government’s “Capitol Clarity” project, Cole revealed how he is now seeing a 2,000 percent chronic illness increase in folks who took [Donald “father of the vaccine” Trump’s “Operation Warp Speed” injections](#).

“Since January 1, in the laboratory, I’m seeing a 20-times increase of endometrial cancers over what I see on an annual basis,” Cole stated in the video.

“I’m not exaggerating at all because I look at my numbers year over year, and I’m like ‘Gosh, I’ve never seen this many endometrial cancers before.’”

Cole revealed these and other statistics at a March 18 event, telling Idahoans that the so-called “vaccines” for the Fauci Flu are invoking a “reverse HIV” type of autoimmune response in people’s bodies.

A normal, well-functioning immune system has two types of cells that keep the body healthy: “helper” T-cells, also known as CD4, and “killer” T-cells, also known as CD8 cells. In the “fully vaccinated,” there is a massive suppression of “helper” T-cells, Cole warns, which leaves the patient susceptible to an array of illnesses.

“Post-vaccine, what we are seeing is a drop in your killer T-cells, in your CD8 cells,” Cole stated. “And what do CD8 cells do? They keep all other viruses in check.”

Is the government injecting people with HIV and calling it “covid vaccination?”

Cole’s claims resonate with the results of [a study](#) published in *The Lancet* late last year which found that Chinese Virus shots greatly increase a person’s risk of developing an HIV infection.

Could it be that the jabs are actually inserting HIV into people’s bodies under the guise of “vaccinating” them against Chinese Germs? Is everyone being lied to about what these vials truly contain?

It would appear so, based on the latest evidence and revelations. While HIV is known to suppress “helper” T-cells, covid jabs are apparently suppressing “killer” T-cells, which Cole says has a similarly negative effect on immunity.

This vaccine-induced “killer T-cell” suppression, Cole goes on to warn, is generating a major uptick in cases of endometrial cancer, melanomas, herpes, shingles, mono, and even human papillomavirus (HPV) when “looking at the cervical biopsies of women.”

Other ingredients in the jabs, including polyethylene glycol, are also causing problems for people’s immune systems. Rather than protect them against a China Virus infection as claimed, these injection additives present a serious toxicity risk that could lead to even more health problems on top of those caused by the jabs’ HIV-like effects.

“Most concerning of all, there is a pattern of these types of immune cells in the body keeping cancer in check,” Cole warns about what these shots are doing, including in young people who were fully healthy before getting jabbed.

“I’m seeing invasive melanomas in younger patients; normally we catch those early, and they are thin melanomas, [but] I’m seeing thick melanomas skyrocketing in the last month or two.”

Cole has spoken at several events over the past several months, warning people about the serious risks involved with getting jabbed. Some of his work has been scrubbed from YouTube for being too truthful, so keep an eye out for fresh content about Dr. Ryan Cole [at Brighteon.com](https://www.brighteon.com).

“Can you imagine what cancer rates will look like five years from now?” asked one commenter at *LifeSiteNews*. “This won’t get reported. They won’t even do a study.”
