

Israeli Report: “The mRNA Experimental Vaccine from Pfizer Killed “About 40 Times More (Elderly) People Than the Disease Itself Would Have Killed” During a Recent Five-week Vaccination Period”

Description

ISRAEL: Haim Yativ and Dr. Seligmann declare that for them, “this is a new Holocaust,” in face of Israeli authority pressure to vaccinate citizens; Pfizer and Bourla did this to Israel, a 2021 ‘KILLING FIELDS

A re-analysis of published data from the Israeli Health Ministry by **Dr. Hervé Seligmann**, a member of the faculty of Medicine Emerging Infectious and Tropical Diseases at Aix-Marseille University, and engineer Haim Yativ reveal, in short, that the mRNA experimental vaccine from Pfizer killed “about 40 times more (elderly) people than the disease itself would have killed” during a recent five-week vaccination period. Among the younger class, these numbers are compounded to death rates at 260 times what the COVID-19 virus would have claimed in the given time frame.’

The screenshot shows the Israel National News website. The article is titled "Have my baby, or pay my bills?" and is by EFRAT ARUTZ SHEVA. The article text is highlighted in blue. The article discusses a mismatch between data published by authorities and the reality on the ground, and mentions three sources of information: Israeli news site Ynet, the Israeli Health Ministry database, and the U.S. federal Vaccine Adverse Event Reporting System (VAERS) database. The article also mentions that in January 2021, there were 3,000 records of vaccine adverse events, including 2,900 for mRNA vaccines. The article compares mortality to other years, stating it is 40 times higher. It also mentions that on February 11, a Ynet article presented data related to vaccination, and the authors of the Nakim article claim to have debunked this analysis based on data published by Ynet itself. The article concludes by stating that the authors say "vaccinations have caused more deaths than the coronavirus would have caused during the same period." and that Haim Yativ and Dr. Seligmann declare that for them, "this is a new Holocaust," in face of Israeli authority pressure to vaccinate citizens. The article also invites specialists to complete their analyses and intend to pursue legal follow-up to their discovery. The Health Ministry was not available for comment on a FranceSoir query.

above all, their conclusions that they compare with data received via a Health Ministry Freedom of Information Act request.

Their findings are:

- There is a mismatch between the data published by the authorities and the reality on the ground.
- They have three sources of information, besides the emails and adverse event reports they receive through the Internet. These three sources are Israeli news site *Ynet*, the Israeli Health Ministry database, and the U.S. federal Vaccine Adverse Event Reporting System (VAERS) database.
- In January 2021, there were 3,000 records of vaccine adverse events, including 2,900 for mRNA vaccines.
- Compared to other years, mortality is 40 times higher.
- On February 11, a *Ynet* article presented data related to vaccination. The authors of the *Nakim* article claim to have debunked this analysis based on data published by *Ynet* itself: "We took the data by looking at mortality during the vaccination period, which spans 5 weeks. By analyzing these data, we arrived at startling figures that attribute significant mortality to the vaccine."
- The authors say "vaccinations have caused more deaths than the coronavirus would have caused during the same period."
- Haim Yativ and Dr. Seligmann declare that for them, "this is a new Holocaust," in face of Israeli authority pressure to vaccinate citizens.

They also invite specialists to complete their analyses, and intend to pursue legal follow-up to their discovery. The Health Ministry was not available for comment on a *FranceSoir* query
