

Javier Milei Spends Nearly \$1 Billion on Trans Hormones for Argentine Kids

Description

ARGENTINE : The government of Argentine President Javier Milei is spending a whopping \$827 million Argentine Pesos on transgender sex change hormones, including puberty blockers that will be provided to children deemed trans.

The massive purchase of body mutilation drugs comes after Milei, a member of Argentina's Libertarian Party, was both hailed and demonized as a "right-wing" icon and government spending slasher by media and political figures all over the world – especially in the United States.

According to the Argentine news publication El Disenso, "the Milei government will spend 827 million on inputs for the homogenization of children, adolescents and trans adults."

In other words, Milei is spending at least \$827 million Argentine Pesos (equivalent to \$972,442 USD) to facilitate the mutilation and complete bodily destruction of Argentine children, and other citizens.

As El Diseno reported:

The current government has just published the approval of a purchase of \$ 827,255,100 in body modification hormones for the gender and diversity program that provides free inhibition drugs and pubertal induction for children, adolescents and trans adults.

With the signature of Nicolás Posse and Mario Antonio [Russo, the](#) government today enabled the purchase of 105,000 containers of inputs for hormonalization requested by the Directorate of Gender and Diversity within the framework of Law 26,743.

Chief of Staff Posse today approved the tender, awarded the lines, authorized to issue purchase orders and impute the expense to the current budget of the Ministry of Health.

As National File has reported, Milei, who's previously been affiliated with the World Economic Forum, has already been ripped for betraying the populist agenda that got him elected.

On his first day in office, he backpedaled on his campaign promise to pull Argentina out of the Paris

Climate Accords, the World [Economic Forum](#)-backed scheme to destroy industry and modern comforts for the average citizen in the name of combatting “climate change.”

The Paris Climate Accords are seen by many as a giant leap toward population control, considering that humans are a carbon-based life form.
