

## JUST-IN: Elon Musk Emphasized Biden's Mistake! Republicans Need Less Divisive Candidate In 2024!

### Description

USA: Elon Musk used Twitter to express his opinion about the 2024 election.

The new Twitter owner shared that Trump should be back on Twitter.

Even though I think a less divisive candidate would be better in 2024, I still think Trump should be restored to Twitter

Previously, Donald Trump said he would use his platform Truth to post his comments. So, Musk emphasized that Biden's mistake was thinking he was selected to change the country. Americans only wanted a break from the Trump drama.

Biden's mistake is that he thinks he was elected to transform the country, but actually everyone just wanted less drama

Elon Musk probably hasn't analyzed the numbers from the 2020 election because he would have understood what happened. He also must watch the documentary 2000 Mules.

It's funny how Musk fell for the bulsh\*t that it was Trump who designed the drama when he was in office. Trump made our lives better!
