

Kissinger & Schmidt: Trilateral Commissioners Declare “Our Human Future”

Description

Warning: Your perception of reality is about to change.

Two of the most prominent members of the Trilateral Commission, Henry Kissinger and Eric Schmidt, have teamed up to write a telling book, *The Age of A.I. And Our Human Future*.

At 97, Kissinger is the oldest founding member of the Trilateral Commission in 1973, and was the right-hand man of David Rockefeller who co-founded the transformative group with Zbigniew Brzezinski.

Eric Schmidt climbed the elitist ladder as CEO of Google and then Chairman of its parent, Alphabet. He has likely done more than any other human to develop and promote Artificial Intelligence. It was Schmidt who hired futurist and creator of the Singularity theory, Ray Kurzweil, as the head of engineering at Google in 2013.

According to Amazon’s description of the book,

Three of our most accomplished and deep thinkers come together to explore artificial intelligence (A.I.) and the way it is transforming human society – and what it means for us all.

*An A.I. learned to win chess by making moves human grand masters had never conceived. Another A.I. discovered a new antibiotic by analyzing molecular properties human scientists did not understand. Now, A.I.-powered jets are defeating experienced human pilots in simulated dogfights. A.I. is coming online in searching, streaming, medicine, education, and many other fields and, in so doing, **transforming how humans are experiencing reality.***

*In The Age of A.I., three leading thinkers have come together to consider how A.I. will change our relationships with knowledge, politics, and the societies in which we live. **The Age of A.I. is an essential road map to our present and our future, an era unlike any that has come before.***

As I have written extensively in my books over the years, the Trilateral Commission is the fountainhead of modern globalization and Technocracy. That is not to suggest that other individuals and groups didn't dream of a New World Order even decades before, but it was the Trilateral Commission and their elitist members who actually pulled it off!

In 2019, Newsweek posted an article that suggested, "Schmidt has been gently aligning himself as the heir to Kissinger, and has populated recent conferences with Google executives."

With the publication of this new book, we now know that Kissinger has officially endorsed his chosen heir.

Furthermore, they have laid out what they see as our certain future. What differentiates them from other dreamers is that they collectively have the power to cause it to happen.
