On April 8, a Ukrainian Tochka-U missile hit the railway station in the city of Kramatorsk. As a result, at least 57 civilians were killed, dozens more were injured.

According to the traditional scenario, immediately after the incident, the Ukrainian authorities sent foreign reporters to the town. However, this time the plan went wrong. The journalists filmed the serial number of the Tochka-U missile which killed dozens of civilians. **They left no doubts that the missile was launched by the AFU.**

The Tochka-U missile in Kramatorsk has a series number Sh91579:

[Last Point In Kiev's Lies About Bloody Attack On Civilians With Tochka-U Missile](#)

Kramatorsk

The Tochka-U missiles, including of the Sh915 series, are actively used by the AFU on the Donbass front lines. The following cases of the strikes with missiles of the same series have been recorded so far:

On September 4, 2014 in Khartsyzsk (Sh915622):

Melitopol

These are only cases confirmed by the footage from the area and which proved the use of the Tochka-U missiles of the SH-915 series only.

Another example was the Tochka-U missile that hit Avdiivka which is under the control of the AFU on March 11, 2022. The fact that the series number was blurred by the National Police of Ukraine confirms that this was not Russian but Ukrainian missile. There would be no need to hide the number if it was the Russian missile.

This is yet another evidence that on April 8, 2022, the AFU intentionally killed dozens of civilians who were trying to leave the town of Kramatorsk, amassing in the railway station. Moreover, the day before, the local authorities called on the citizens to leave Kramatorsk as soon as possible. Thus, this was a planned provocation by the Kiev regime. They called as many civilians to the station as possible right before the attack.

The same scenario of the bloody attack on civilians was used on the morning of March 14, when [Ukrainian units struck the center of Donetsk](#) with a Tochka-U tactical missile equipped with cluster munitions, killing dozens of civilians as well.

Today, the Kiev regime continues to spread lies that the Tochka-U which hit the station in Kramatorsk was Russian, or Belorussian, or even that it was the only Russian Tochka-U brought to Ukraine by a special order to hit the train station. Kiev had to invent new stories, because the Russian military has not used Tochka-U missiles for many years.

Another mistake of the Kiev propaganda revealed the truth.
