

Lived A Good Life? Globalists Suggest Get Out Of The Way "For the Children"

Description

Global elitists have long sought population reduction in order to save remaining resources for themselves. Now, propaganda is emerging that suggests old people should consider getting out of the way for the sake of the children. Any society that would kill its young while still in the womb will have no problem in setting up euthanasia centers to kill the elderly. ? TN Editor

In the height of hypocrisy of "for the children" the World Economic Forum is now complaining about overpopulation and/or suggesting that older people consider euthanasia "for the children". In a video seen on Twitter full of geriatrics saying they've had a good life after explaining there's too many humans on the planet. The video suggests that elderly folks who no longer are productive should opt for euthanasia. I'm certain children all over the world are thankful their grandparents will be suggested to off themselves for their benefit.

And while it is couched in "for the children" narrative, the truth of the matter is much more sinister. Christina Lagarde of the International Monetary Fund has been quoted as saying, "Old people live too long and this is a risk for the global community. What Christine is saying in effect is, unless you are a productive member of society your entire life, you don't deserve to live.

Christine, with her white hair, manicured nails, and designer clothing probably never worked a manual job a day in her life. She would like to tell our senior citizens who defended this country, grew our food, built machines and trucks, mined coal, drilled oil, and worked on the railroad that now that they are no longer useful, they should just die. It is psychopathy to look at a person who has worked 30, 40, 50, and sometimes even 60 years, at the end of their life when they should be enjoying the twilight hours left for them and tell them they just need to die because they are a drain on the global community.

How have we allowed these people to get so far so fast to attack our most vulnerable? 40 plus years ago when they allowed abortion to kill the most innocent among us, many people said it would

eventually end up to terminating the elderly as well. There were lots of handwaving and dismissal of that argument. However, 40 plus years on, we see that that is exactly what they are planning on doing. This, after a worldwide pandemic from a bioweapon produced by our own government within China which targeted specifically, it seems, the elderly and infirmed. They now want senior individuals who no longer “produce” enough to justify their life to opt for euthanasia.
