The media's lies are getting innocent people killed and may be inciting more anti-white violence than ever.

Interracial murders against whites have reached extreme highs in FBI data in states with high black populations.

Throughout the south, about half of murder offenders against non-hispanic whites in 2021 were black or hispanic, an unprecedented fraction for as long as data exist.

If you want to check this yourself you can use the online EZASHR tool to generate racial crosstabs but it's less detailed and only goes up to 2020. But you can still see the interracial share of violence increasing over the past decade.<https://t.co/RhQ6H1j5ID>

In Oklahoma, black man shoots two people in the back of the head and kills them.

According to authorities, he "shot both men because they were white."

#1 Based on a study of 1,100 articles from six major newspapers between 2019 and 2021, the media is four times more likely to mention the race of white murderers as compared to black murderers<https://t.co/cilg5QdFgz> pic.twitter.com/TmWX4MIO4i

Whereas Twitter was used in the past to incite anti-white hatred, Twitter under Musk is actually countering hate hoaxes and disinformation, including [the media's lies about Jordan Neely](#).

He also loved to harass, threaten, and assault people, which is why he'd been arrested 44 times

Jordan Neely loved to dance and perform.

On Tuesday, while suffering a mental health crisis, he was choked to death while people watched and cheered.

Jordan needed care. Instead, he was brutally murdered. This is not who we are as New Yorkers.

 **Readers added context they thought people might want to know**

A video showing the altercation has no apparent cheering and shows multiple bystanders trying to restrain Neely after witnesses claim Neely was erratic and verbally aggressive.
