10:34 In the Debaltseve direction, Ukrainian gang formations are hitting the advanced settlements hard. Logvinovo is one of the closest. Yesterday it came under fire from 152mm howitzers. Grads and heavy mortars. The morning began with mortar shelling. The JCCC recorded incoming 120 mm mines.

9:52 Basurin on the blockade and storming of Mariupol: Everything is going as planned. Volnovakha will soon be ours. Mariupol is blockaded. Troops will move further in a direction that will help us to finally stop shelling residential areas of settlements not only at ours, but also at our neighbours in Luhansk. It takes a couple of days to understand how the situation in Mariupol will develop. Because in any case there will be a negotiation process – persuading the enemy to lay down arms, surrender or leave the city so that civilians do not suffer. A humanitarian catastrophe is about to happen there – no light, no food. We must do everything so that people do not suffer, that is why we said we would open a humanitarian corridor. If there is a normal consciousness that they will let civilians leave the city it would ease our way. If not, I think negotiations, but no one has cancelled the special operation.
