

Military Situation In Ukraine On March 12, 2022 (Map Update)

Description

Military Situation In Ukraine On March 12, 2022 (Map Update)

Initially, Western media reports focused on Ukrainian soldiers completely and utterly defeating Russian soldiers. That was noteworthy about Western media accounts: lots of Ukrainian soldiers, and all of them allegedly victorious.

Now, Western media reports say NOTHING about Ukrainian soldiers. The new narrative in Western media is Russian soldiers slaughtering and killing Ukrainian civilians. That's all. It's as if the Ukrainian troops somehow disappeared in Western media reporting.

Western media has zero credibility. It's all just one giant public relations tool in the service of US/NATO/Ukraine governments. It's impossible for anyone to get an accurate idea of what's happening in this war by relying on Western media.
