

“Most people have no idea what’s coming” Robert Kiyosaki warns

## Description

## It’s tragic what’s happening – get to know what’s real

**Robert Kiyosaki** warns of the coming collapse of everything from real estate to the U.S. dollar and stocks. He compares today’s situation with 2007-08, and points out that interest rate hikes will crash people’s 401(k)s 50%.

### Excerpts

When Biden took us off the pipeline oil prices went up. Oil produces fertilizer and when fertilizer is no longer cheap people can’t produce food.

A stock market crash will bring down the baby boomers so we’re in serious, serious trouble here.

I am a US Marine who fought in Vietnam twice as a pilot. I’ve seen what happens under communism, you can see it in the Ukraine. **Communists always kill civilians** and that’s what people don’t realize.

Russia and China are now ganging up on the U.S. It’s really a dangerous world right now.

40% of Americans don’t have a \$1,000, so when inflation goes up we’re going to wipe out 50% of the U.S. population, and that’s when the revolution starts.

## We are in the throes of a global regime change, not a covid health crisis nor an environmental crisis

# The Biggest Changes in World History Are Coming!!!

**March 29.22**

The bottom line is that quantitative tightening is the opposite of quantitative easing. Quantitative tightening destroys money and that tends to make stock prices fall. We're about to get a heavy dose of quantitative tightening coming into effect within the next couple of months.

## The crash of 1929 is nothing compared to what's coming

**March 22.22**

Robert Kiyosaki warns investors of an upcoming market crash, inflation, and serious economic consequences for the U.S. dollar as a result of crazy money printing over the last two years.

The reason Robert Kiyosaki does not care for Janet Yellen or Jerome Powell is because they're both Marxist.

A direct quote from **Vladimir Lenin** "The establishment of a central bank is 90% of communism" and "The best way to destroy a capitalist system is to debauch the currency." That was done 1971, when Nixon took the dollar off the gold standard.

The next one is going to be the biggest of them all.

## Wiped out in more ways than one?

## Distraction is the enemy of vision

Distraction is a key strategy of globalist rulers. While most people are distracted with unjustifiable covid restrictions, controlled demolition of the global economic and financial system is well on its way, and at the international level tyrannical laws are being put in place without full disclosure and informed consent of the people.
