

## NASA engineer admits they can't get past the Van Allen Belts (VIDEO 7 min)

### Description

"We must solve theses challenges before we send people through this region of space"

Admission starts at: 3:00

This video released by NASA about the upcoming Orion space exploration craft, shows a NASA scientist admitting that they still haven't worked out how to properly shield the spacecraft from the radiation emitted from the Van Allen belts.

Important to note:

The Apollo missions allegedly passed the Van Allen Radiation Belts.

Does technology go backwards?

Why can't they simply use technology that they have used 50 years ago!?

Kelly Smith, NASA engineer
