

## NATO-Backed Kiev Regime Resorts to Nuclear Terrorism

### Description

**Europe's biggest nuclear power plant is under repeated missile attacks by the NATO-backed Kiev regime. Let that appalling fact sink in for a moment. Can anything more criminal and reckless at this time be imagined?**

Bear in mind that the very governments (regimes really) responsible for this abysmal situation are the same ones who proclaim "rules-based order" and "liberal democracy". Evidently, their rhetoric is just a sick facade for totalitarianism and lawlessness.

What is going on is nuclear terrorism by the Nazi-infested Kiev regime and its Western sponsors. The missiles hitting the Zaporozhye nuclear plant (ZNPP) are supplied by the United States and its NATO allies. The power station has been under sustained artillery or drone attack since last week. A fire at the installation has already been reported although the Russian military and the Ukrainian civilian operators at the Zaporozhye plant managed to put the blaze out. The ZNPP is reckoned to contain hundreds of tonnes of enriched uranium and other spent nuclear fuel. Situated on the mighty Dnieper River in southeast Ukraine that flows into the Black Sea, if the ZNPP is fatally hit the damage would be catastrophic for Europe and the rest of the world. The resulting radioactive contamination would far exceed that of Chernobyl or the Fukushima disaster. The world is on the brink of a deliberately orchestrated cataclysm.

UN Secretary-General Antonio Guterres and the UN international nuclear supervising agency, the IAEA, have both condemned the attacks on Zaporozhye as "suicidal". They have appealed for demilitarization of the area. The UN is being cowardly in its restraint by not specifically condemning the NATO-weaponized Kiev regime. The UN is hiding behind cynical claims that there are "conflicting reports" of who is to blame for the shelling of the nuclear plant.

The United States and its Kiev proxy are blaming Russia for the military strikes. Displaying twisted logic, they say Russia is carrying out the attacks in order to smear the Ukrainian regime. They also claim that Russia is using the plant as a cover for its military forces.

Russian forces commandeered the Zaporozhye NPP in early March, days after they invaded Ukraine

on February 24. Russia's military operation was compelled by the relentless build-up of NATO's offensive threat in neighboring Ukraine since the CIA coup d'état in 2014. Securing the ZNPP was a top priority given the criminal recklessness of the NATO-backed Kiev regime. Now the United States and its Kiev catspaw are absurdly making out that Russia is hitting its own forces and territory under its control, including the vitally important ZNPP.

The trajectory of missiles fired on the ZNPP clearly shows that the attacks are coming from the territory under the control of the Ukrainian forces and its NATO accomplices. The rational suspicion is that the long-range multiple-launch rocket systems supplied and overseen by the U.S., Britain and Germany are involved.

Washington and its NATO allies are calling on Russia to relinquish control of the nuclear plant and give it back to the Kiev regime.

That preposterous demand exposes who the nuclear terrorists are. The United States and its NATO axis are responsible for holding Europe and the world hostage with the threat of nuclear catastrophe.

We should note that anything claimed by the Kiev regime and its Western handlers, including the entire news media acting as propaganda outlets, cannot be taken remotely seriously. This week, the Kiev puppet president Vladimir Zelensky [admitted](#) through his aide Mikhail Podolyak that all public statements are "information warfare" designed to deceive Russia. The alleged Russian massacres at Bucha and Mariupol, allegations of mass rapes by Russian soldiers, and allegations of bombing civilians all fit into this admission of lies.

The furor over a [report](#) by Amnesty International last week blaming the Kiev regime for using civilian centers such as hospitals, schools and homes as military shields is just the tip of a very dirty iceberg. But it illustrates the depravity and corruption of the NATO-backed Kiev regime.

The risible accusations that Russia is shelling the Zaporozhye nuclear power plant as some kind of propaganda stunt betray the guilt of projecting onto others what the accusers themselves are capable of doing.

Russian forces have secured Europe's largest nuclear power station and up to now have averted disaster by protecting it. It is Russia that [summoned](#) the UN Security Council to convene this week in an emergency session to highlight the extreme danger. Moscow is calling for demilitarization and for IAEA inspectors to be allowed access to the ZNPP in order to report the circumstances. It is the Kiev regime and its Western sponsors who are preventing those calls. The United States and its NATO axis are supplying more and more long-range missiles to Ukraine and slandering Russia with claims of "nuclear terrorism". The U.S. axis is in effect giving a green light to the Kiev regime to continue its criminal offensive.

This week saw the 77th anniversary of the U.S. atomic bombings of Hiroshima and Nagasaki. That horror was carried out as a criminal act of state terrorism. American justifications for the crimes on August 6 and 9, 1945, have always been known – albeit not widely known due to Western media lies – to be baseless propaganda. The intended effect of the U.S. imperial regime then was to terrorize the rest of the world into submitting to its presumed global dominance.

The same abominable, lawless logic is on show again with the situation in Ukraine over the

Zaporozhye nuclear plant. The United States is using its Kiev proxy to hold the world hostage to its imperial objectives.

The psychopathic gambling by the U.S. regime is heinous. Russia has warned that if its territory comes under threat it will use nuclear forces to defend itself. Nuclear war is an increasing risk. If the U.S.-sponsored Kiev regime makes a fatal blow on Zaporozhye causing untold radioactive contamination of Europe, Russia and the rest of the world, what do the Americans expect Moscow to do? Yet this madness by Washington is being pursued.

A diplomatic end to the crisis over Zaporozhye as with the general war in Ukraine is being thwarted by NATO's militarism. The world's foremost nuclear terrorist regime – in Washington – is playing with fire and acting as the perverse God of Death again, holding the whole world to ransom for its pernicious ends.

A simple, urgent test beckons: stop the military attacks on Zaporozhye. Now, who is objecting?
