

## Nearly Every Facet of This “Pandemic” is Created, Spread, and Made More Deadly by The People Who Claim They Are “Experts”

### Description

STAT News has a new article titled, [\*\*\*The ‘five pandemics’ driving 1 million U.S. Covid deaths\*\*\*](#). Like almost everything they publish, the article is clever, well-written, and almost entirely wrong. The author, [\*\*J. Emory Parker\*\*](#), claims that the pandemic is primarily a story of older, unvaccinated, rural, poor people with a deadly initial wave that has faded into a lower infection fatality rate today. I’m not going to refute it point-by-point other than to say that he is missing the forest for the trees.

**Nearly every facet of the pandemic is iatrogenic.**

By Dr Toby Rogers

Democrats now interpret all data through the lens of The Narrative (TM) that makes Dems look like heroes, Pharma look like Gods, and Republicans look like unwashed barbarians who deserve death for their failure to obey their betters. It’s not so much science as bougie-supremacy. Self-reflection, paradox, and admitting mistakes are of course banned from the bougie lexicon.

In this short article, [\*\*\*The ‘five pandemics’ driving 1 million U.S. Covid deaths\*\*\*](#), I’ve stolen his title (in hopes of messing with the search engines) and I set the record straight. Any honest assessment of the last two years leads to the inexorable conclusion that every facet of the pandemic is a direct result of the intellectual and moral failures of the “expert class” itself.

**1. Tony Fauci created the pandemic by funding [\*\*risky gain-of-function research\*\*](#) at a bioweapons lab in Wuhan China.** Somehow a chimaera virus, engineered to be more lethal to humans, escaped. No Tony Fauci, no pandemic. All else flows from this.

**2. Fauci, the FDA, and CDC blocked access to prophylaxis and early treatment.** The [\*\*CDC’s own research\*\*](#) showed that chloroquine is safe and effective for prophylaxis and early treatment of SARS coronaviruses (hydroxychloroquine is even safer than chloroquine). The U.S. had a massive stockpile for this very purpose that was never used. About 90% of Covid-19 fatalities in the U.S. could have

been prevented if public health officials had followed [proper protocols](#) and used about twenty [off-the-shelf treatments](#) that are safe and effective. Instead, the FDA and CDC ridiculed the best treatments, stopped doctors from prescribing them, and prohibited pharmacies from filling these prescriptions.

**3. Hospitals used the wrong protocols and continue to use the wrong protocols.** Failing to provide early treatment (turning people away from hospitals to preserve capacity), ventilators, and Remdesivir are all death sentences. Large hospitals have such abysmal outcomes because they used the wrong protocols and they seem to have no ability to course-correct based on actual data.

**4. Blue states that followed the CDC's advice to return Covid+ patients to nursing homes committed [senicide](#)** — the systematic murder of the elderly. The death toll in the elderly was and is so high because they were never provided prophylaxis, immune support, nor any early treatment and their residences were intentionally seeded with the sick — once again in the misguided attempt to preserve hospital capacity (TM).

**5. Promoting mass injections with negative efficacy, keeps the pandemic going indefinitely.** These useless shots also seem to be driving the evolution of variants. The pandemic will never end as long as the government continues to promote these mRNA shots that lack sterilising immunity.

The entire pandemic, from the origins, through the early days, until now, is a self-inflicted, man-made crisis. This is an *iatrogenic pandemic* — created, spread, and made more deadly by the people who claim that they are “experts”. Everything that public health has done for two years has made things significantly worse. As long as the people who are wrong about everything remain in power, the crisis will continue.

## About the Author

Dr. Toby Rogers has a PhD in political economy from the University of Sydney in Australia. He also has a Master of Public Policy degree from the University of California, Berkeley. Dr. Rogers writes, speaks, and teaches on the costs and likely causes of autism, corruption in the pharmaceutical industry, and the revolution we need to stop the epidemics of chronic illness in children.
